Spatial Revolution Christina E. Crawford, 2022-02-15 Spatial Revolution is the first comparative parallel study of Soviet architecture and planning to create a narrative arc across a vast geography The narrative binds together three critical industrial residential projects in Baku Magnitogorsk and Kharkiv built during the first fifteen years of the Soviet project and followed attentively worldwide after the collapse of capitalist markets in 1929 Among the revelations provided by Christina E Crawford is the degree to which outside experts participated in the construction of the Soviet industrial complex while facing difficult topographies near impossible deadlines and inchoate theories of socialist space making Crawford describes how early Soviet architecture and planning activities were kinetic and negotiated and how questions about the proper distribution of people and industry under socialism were posed and refined through the construction of brick and mortar steel and concrete projects living laboratories that tested alternative spatial models As a result Spatial Revolution answers important questions of how the first Soviet industrialization drive was a catalyst for construction of thousands of new enterprises on remote sites across the Eurasian continent an effort that spread to far flung sites in other socialist states and capitalist welfare states for decades to follow Thanks to generous funding from Emory University and its participation in TOME Toward an Open Monograph Ecosystem the ebook editions of this book are available as Open Access volumes from Cornell Open cornellpress.cornell.edu/cornell-open and other repositories

Russian Architecture and the West Dmitrii Olegovich Shvidkovskii, Shvidkovsky, 2007-01-01 This is the first book to show the development of Russian architecture over the past thousand years as a part of the history of Western architecture Dmitry Shvidkovsky Russia's leading architectural

historian departs from the accepted notion that Russian architecture developed independent of outside cultural influences and demonstrates that to the contrary the influence of the West extends back to the tenth century and continues into the present. He offers compelling assessments of all the main masterpieces of Russian architecture and frames a radically new architectural history for Russia. The book systematically analyzes Russian buildings in relation to developments in European art, pointing out where familiar European features are expressed in Russian projects. Special attention is directed toward decorations based on Byzantine models, the heritage of Italian master builders and carvers, the impact of architects and others sent by Elizabeth I, the formation of the Russian Imperial Baroque, the Enlightenment in Russian art, and 19th and 20th century European influences. With over 300 specially commissioned photographs of sites throughout Russia and western Europe, this magnificent book is both beautiful and groundbreaking.

Blueprints and Blood Hugh D. Hudson, Jr., 2015-03-08 Analyzing totalitarianism from below in a crucial area of Soviet culture, Hugh Hudson shows how Stalinist forces within the architectural community destroyed an avant garde movement of urban planners and architects who attempted to create a more humane built environment for the Soviet people. Through a study of the ideas and constructions of these visionary reformers, Hudson explores their efforts to build new forms of housing and settlements designed to free the residents, especially women, from drudgery, allowing them to participate in creative work and to enjoy the songs of larks. Resolving to obliterate this movement of human liberation, Stalinists in the field of architecture unleashed a little terror from below prior to Stalin's Great Terror. Using formerly secret Party archives made available by perestroika, Hudson finds in the rediscovered theoretical work of the avant garde architects a new understanding of their aims. He shows, for instance, how they saw the necessity of bringing elite desires for a transformed world into harmony with the people's wish to preserve national culture. Such goals brought their often divided movement into conflict with the Stalinists, especially on the subject of collectivization. Hudson's provocative work offers evidence that in spite of the ultimate success of the Stalinists, the Bolshevik Revolution was not monolithic; at one time it offered real architectural and human alternatives to the Terror. Riqaibushin, Nadezhda Ivanovna Smolina, 1992 Soviet architecture was born and shaped from the outset by dispute from the introductory essay This catalog documents the architectural output of a country besieged with powerful and conflicting political pressures and aspirations Text and photos combine to record the architectural heritage of the Communist regime Translated from the Russian Lacks an index 9 5x11 Annotation copyright by Book News Inc Portland OR *Soviet Architectural Avant-Gardes* Danilo Udovicki-Selb, 2020-05-14 Conventional readings of the history of Soviet art and architecture show modernist utopian aspirations as all but prohibited by 1932 under Stalin's totalitarianism Soviet Architectural Avant Gardes challenges that view Radically redefining the historiography of the period it reveals how the relationship between the Party and practicing architects was much more complex and contradictory than previously believed and shows in contrast to the conventional scholarly narrative how the architectural avant garde was able to persist at a time when it is widely considered to have been driven underground In doing so this book provides an essential perspective on how to analyse evaluate and re imagine the history of modernist expression in its cultural context It offers a new understanding of ways in which 20th century social revolutions and their totalitarian sequels inflected the discourse of both modernity and modernism The book relies on close analyses of archival documents and architectural works Many of the documents have been rarely if ever discussed in English before while the architectural projects include iconic works such as the Palace of Soviets and the Soviet Pavilion at the Paris 1937 World Exposition as well as remarkable works that until now have been neglected by architectural historians inside and outside Russia In a fascinating final chapter it also reveals for the first time the details of Frank Lloyd Wright's triumphant welcome at the First Congress of Soviet Architects in Moscow in 1937 at the height of Stalin's Terror **Architecture of the Stalin Era** Alexei Tarkhanov, Sergei Kavtaradze, 1992 **Constructivist Architecture in the USSR** Anatole Kopp, 1985 **Bulletin of the Atomic Scientists**, 1982-03 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin's iconic Doomsday Clock stimulates solutions for a safer world **Encyclopedia of Twentieth Century Architecture** R. Life and Work in the USSR, 1930-1936 Tatiana Efrussi, 2025-03-31 Swiss architect and urban planner the second director of the Bauhaus Dessau Hannes Meyer spent about six years in the USSR from 1930 to 1936 This book presents the first in depth study of Hannes Meyer's activities during the years of early Stalinism There is a

global interest in this architect's legacy today but his work can hardly be understood without a closer examination of the key chapter in his career. This book is an attempt to challenge the usual Western-centered perspective and explore not only what Meyer could bring to the Soviet Union but also what he sought to learn there and how this interaction influenced his work and thinking. The somewhat provocative title underscores this thesis. A detailed reconstruction of his professional activities during this period was made possible through archival research in several countries: Russia, Germany, Austria, and Switzerland, and field trips across Russia. In the end, the narrative offers a glimpse into the Soviet architectural context of the 1930s: networks, hierarchies, behavioral strategies, theories, and interpretations of major polemical concepts such as proletarian architecture and socialist realism. Among the projects for socialist cities, Meyer was commissioned to create the urban plan for the capital of the Jewish Autonomous Region in the USSR, Birobidzhan. The dedicated book chapter explores his involvement in the search for a distinct Soviet Jewish style. Hannes Meyer, the most controversial of the architects associated with the Bauhaus, was passionately involved in politics, and available documents indicate his desire to become a Soviet architect at all costs. The research allows us to view Meyer not only as a victim but also as an actor in the early Stalinist system based on violence.

Modern Architecture: A Critical History (Fifth) (World of Art) Kenneth Frampton, 2020-09-08. An extensively revised and updated edition of a bestselling classic on modern architecture and its origins by Kenneth Frampton. Kenneth Frampton's highly acclaimed survey of modern architecture and its origins has been a classic since it first appeared in 1980. Starting with the cultural developments since 1750 that drove the modern movement, moving through the creation of modern architecture and exploring the effects of globalization and the phenomenon of international celebrity architects, this book is the definitive history of modern architecture. For this extensively revised and updated fifth edition of *Modern Architecture*, Frampton added new chapters exploring the ongoing modernist tradition in architecture while also examining the varied responses to the urgent need to build more sustainably and create structures that will withstand changing climates. This new edition features completely redesigned interiors and an updated and expanded bibliography, making this volume more indispensable than ever.

Built from Below: British Architecture and the Vernacular Peter Guillery, 2010-09-13. This book extends the concept of British vernacular architecture beyond its traditional base of pre-modern domestic and industrial architecture to embrace other buildings such as places of worship, villas, hospitals, suburban semis, and post-war mass housing. Engaging with wider issues of social and cultural history, this book is of use to anyone with an interest in architectural history. Presented in an essentially chronological sequence from the medieval to the post-war, diverse fresh viewpoints in the chapters of this book reinforce understanding of how building design emerges not just from individual agency, that is, architects, but also from the collective traditions of society.

Architecture and Revolution Neil Leach, 2003-09-02. *Architecture and Revolution* explores the consequences of the 1989 revolutions in Central and Eastern Europe from an architectural perspective. It presents new writings from a team of renowned architects, philosophers, and

cultural theorists from both the East and the West They explore the questions over the built environment that now face architects planners and politicians in the region They examine the problems of buildings inherited from the communist era some are environmentally inadequate many were designed to serve a now redundant social programme and others carry the stigma of association with previous regimes Contributors include Daniel Libeskind Bernard Tschumi Laura Mulvey Helene Cixous Andrew Benjamin and Frederic Jameson
