Symbolism And Interpretation:

Symbolism and Interpretation Tzvetan Todorov, 1986 In *Symbolism and Interpretation* Tzvetan Todorov examines two aspects of discourse its production which has traditionally been the domain of rhetoric and its reception which has always been the object of hermeneutics He analyzes the diverse theories of symbolism and interpretation that have been elaborated over the centuries and considers their contribution to a general theory of verbal symbolism discussing a wide range of thinkers from the Sanskrit philosophers and Aristotle to the German Romantics and contemporary semioticians Todorov begins by examining general ideas of linguistic symbolism and the interpretive process He then turns to a detailed consideration of two of the most influential and pervasive interpretative strategies in Western thought the patristic exegesis of Augustine and Aquinas and the philological exegesis foreshadowed in the work of Spinoza developed by Wolf Ast Boeckh and Lanson and criticized by Schleiermacher Todorov clarifies in masterly fashion the intricacies of the many schools of thought and refines the concepts crucial to critical theory today including the distinctions between language and discourse direct and indirect meaning sign and symbol Ably translated by Catherine Porter *Symbolism and Interpretation* provides a coherent and innovative framework that is indispensable to the study of semiotics its history and its future

Symbol and Interpretation D.M. Rasmussen, 2012-12-06 For the past four or five years much of my thinking has centered up on the relationship of symbolic forms to philosophic imagination and interpretation As one whose own philosophic speculations began at the end of a cultural epoch under methodologies dominated either by neo Kantianism or schools of logical empiricism the symbol as a product of a cultural imagination has been diminished it has been necessary for those who wanted to preserve the symbol to find appropriate philosophical methodologies to do so In the following chapters we shall attempt to show through a consideration of a series of recent interpretations of the symbol as well as through constructive argument that the symbol ought to be considered as a linguistic form in the sense that it constitutes a special language with its own rubrics and properties There are two special considerations to be taken account of in this argument first the definition of the symbol and second the interpretation of the symbol Although we shall refrain from defining the symbol explicitly at this point let it suffice to state that our definition of the symbol is more aesthetic than logical in the technical sense of formal logic more cultural than individual more imaginative than scientific The symbol in our view is somewhere at the center of culture the well spring which testifies to the human imagination in its poetic psychic religious social and political forms

Rethinking Symbolism Dan Sperber, 1975-09-25 The main thrust of this book is to deliver a major critique of materialist and rationalist explanations of social and cultural forms but in the process Sahlins has given us a much stronger statement of the centrality of symbols in human affairs than have many of our practicing symbolic anthropologists He demonstrates that symbols enter all phases of social life those which we tend to regard as strictly pragmatic or based on concerns with material need or advantage as well as those which we tend to view as purely symbolic such as ideology ritual myth moral codes and the like Robert McKinley Reviews in Anthropology

Language, Meaning, Interpretation Guttorm Fløistad, 2005-12-07 Philosophy of logic and language and of meaning and communication are central to this volume The discussion of these issues involves analytical approaches including semantics and semiotics philosophy of science mathematical logic phenomenology hermeneutics and some aspects of philosophical anthropology and aesthetics Philosophy of the Absolute also belongs to this broad repertoire of philosophical problems and disciplines A number of problems and viewpoints derive from the metaphysical system any relativistic view on ethical values for instance makes sense in relation to some absolute Metaphysical system building may have come to an end but after all it belongs to philosophy to remind us of our past

Symbolism in Terrorism Jonathan Matusitz, 2014-09-16 The symbolic value of targets is what differentiates terrorism from other forms of extreme violence Terrorism is designed to inflict deep psychological wounds on an enemy rather than demolish its material ability to fight The September 11 2001 attacks for example demonstrated the power of symbolism The World Trade Center was targeted by Al Qaeda because the Twin Towers epitomized Western civilization U S imperialism financial success modernity and freedom The symbolic character of terrorism is the focus of this textbook A comprehensive analysis it incorporates descriptions definitions case studies and theories Each chapter focuses on a specific dimension of symbolism in terrorism and explains the contexts and processes that
