

The book cover features a detailed, artistic illustration of a neuron. The cell body is a bright, glowing yellow-green, with several long, branching dendrites and axons extending outwards. The branches are colored in shades of green and blue, with a textured, almost fibrous appearance. The background is a dark, deep blue. The title 'SYNAPTIC SELF' is centered within a white rectangular box, and the author's name 'Joseph LeDoux' is at the top left. A yellow ruler is visible on the right side of the book, showing measurements in inches and centimeters.

Synaptic Self:

Synaptic Self Joseph LeDoux, 2003-01-28 In 1996 Joseph LeDoux's *The Emotional Brain* presented a revelatory examination of the biological bases of our emotions and memories. Now the world renowned expert on the brain has produced with a groundbreaking work that tells a more profound story how the little spaces between the neurons the brain's synapses are the channels through which we think act imagine feel and remember. Synapses encode the essence of personality enabling each of us to function as a distinctive integrated individual from moment to moment. Exploring the functioning of memory the synaptic basis of mental illness and drug addiction and the mechanism of self awareness *Synaptic Self* is a provocative and mind expanding work that is destined to become a classic.

Synaptic Self Joseph LeDoux, 2003-01-28 Following up his 1996 *The Emotional Brain* the world renowned brain expert presents a groundbreaking work that tells a more profound story how the little spaces between the neurons the brain's synapses are the channels through which we think feel imagine act and remember.

Synaptic Self Joseph E. LeDoux, 2002 Joseph LeDoux believes that the synapses the little spaces between the neurons in our brains are the key to everything the brain does. They are the channels of communication by which we think act imagine feel and remember. But synapses do more. They also allow interactions between mental processes allowing us to remember the important stuff in life better than the trivial. What's more synapses encode the essence of the individual allowing us to be the same person from moment to moment week to week and year to year. In short the self is synaptic.

Mindworlds J. Andrew Ross, 2015-10-06 Understanding consciousness is one of the central scientific challenges of our time. This book presents Andy Ross's recent work and discusses a range of perspectives on the core issues. The chapters are based on texts written for a variety of occasions and audiences. Reading them in order one senses a growing clarity in the articulation of the new ideas some of which are deep and rather subtle and glimpses the outlines of a dynamic field. Ross has taken pains to unify the collection and make the main thread clearly visible. His new ideas are of fundamental importance and readers who grapple with them should gain insight that amply rewards the effort.

Unsupervised Learning Matthew Kyan, Paisarn Muneesawang, Kambiz Jarrah, Ling Guan, 2014-05-02 A new approach to unsupervised learning. Evolving technologies have brought about an explosion of information in recent years but the question of how such information might be effectively harvested archived and analyzed remains a monumental challenge for the processing of such information is often fraught with the need for conceptual interpretation a relatively simple task for humans yet an arduous one for computers. Inspired by the relative success of existing popular research on self organizing neural networks for data clustering and feature extraction *Unsupervised Learning A Dynamic Approach* presents information within the family of generative self organizing maps such as the self organizing tree map SOTM and the more advanced self organizing hierarchical variance map SOHVM. It covers a series of pertinent real world applications with regard to the processing of multimedia data from its role in generic image processing techniques such as the automated modeling and

removal of impulse noise in digital images to problems in digital asset management and its various roles in feature extraction visual enhancement segmentation and analysis of microbiological image data Self organization concepts and applications discussed include Distance metrics for unsupervised clustering Synaptic self amplification and competition Image retrieval Impulse noise removal Microbiological image analysis Unsupervised Learning A Dynamic Approach introduces a new family of unsupervised algorithms that have a basis in self organization making it an invaluable resource for researchers engineers and scientists who want to create systems that effectively model oppressive volumes of data with little or no user intervention

Image Analysis and Recognition Aurélio Campilho, Mohamed Kamel, 2006-09-22 The two volume set LNCS 4141 and LNCS 4142 constitutes the refereed proceedings of the Third International Conference on Image Analysis and Recognition ICIAR 2006 The volumes present 71 revised full papers and 92 revised poster papers together with 2 invited lectures Volume I includes papers on image restoration and enhancement image segmentation image and video processing and analysis image and video coding and encryption image retrieval and indexing and more Dead Sea Media Shem Miller, 2019-09-16 In Dead Sea Media Shem Miller offers a groundbreaking media criticism of the Dead Sea Scrolls Although past studies have underappreciated the crucial roles of orality and memory in the social setting of the Dead Sea Scrolls Miller convincingly demonstrates that oral performance oral tradition and oral transmission were vital components of everyday life in the communities associated with the Scrolls In addition to being literary documents the Dead Sea Scrolls were also records of both scribal and cultural memories as well as oral traditions and oral performance An examination of the Scrolls textuality reveals the oral and mnemonic background of several scribal practices and literary characteristics reflected in the Scrolls

The Heart of Judgment Leslie Paul Thiele, 2006-09-04 *The Heart of Judgment* explores the nature historical significance and continuing relevance of practical wisdom Primarily a work in moral and political thought it also relies extensively on research in cognitive neuroscience to confirm and extend our understanding of the faculty of judgment Ever since the ancient Greeks first discussed practical wisdom the faculty of judgment has been an important topic for philosophers and political theorists It remains one of the virtues most demanded of our public officials The greater the liberties and responsibilities accorded to citizens in democratic regimes the more the health and welfare of society rest upon their exercise of good judgment While giving full credit to the roles played by reason and deliberation in good judgment the book underlines the central importance of intuition emotion and worldly experience

The Missing Link Roy Abraham Varghese, 2013 *The Missing Link* blazes a unique trail through the conundrums and controversies generated by evolutionary theory and religious thought To date these debates have centered on the origin of species This book however turns the spotlight on the origins of consciousness thought and the self while also considering the relationship between God and science Remarkably Darwin himself highlighted the relevance of the origin of consciousness to the question of a creator Therefore *The Missing Link* works within a framework that was laid out at the dawn of the creation evolution debate Since that time however this

framework has rarely been considered or explored The unifying theme of this volume is the conclusion that the existence of God is grounded in rational thought Contributors to The Missing Link include three Nobel Prize winners renowned scientists from Oxford Cambridge and Harvard and noted contemporary philosophers of consciousness language and the self Moral Learning Monica Taylor, 2016-03-16 As moral educators we are more used to teaching others and researching their learning and moral development than reflecting on and writing formally about our own moral learning We are not just professionals with an interest and supposedly some expertise in morality and education we also have gendered and culturally differentiated personal and professional lives in which there are moral issues puzzles and conflicts We are situated in diverse political and institutional contexts whilst participating in an interdisciplinary professional field and interacting in an increasingly globalised world How do we integrate the personal professional and political in our moral learning In this book celebrating the Journal of Moral Education's 40th anniversary 15 invited contributors at different stages in their careers from a range of disciplinary and cultural backgrounds and from around the world offer their academic analytical and autobiographical reflections Through their stories narratives analyses questions and concerns and across many diverse topics central to moral education we see how they each confront their own moral learning personally professionally and politically This book offers insights from formative experiences and ongoing issues and challenges to suggest how all educators might take more account of the interrelation of the personal professional and political in moral teaching and learning This book was originally published as a special issue of the Journal of Moral Education
