Syntactic Phrase Structure Phenomena In Noun Phrases And Sentences:

Syntactic Phrase Structure Phenomena in Noun Phrases and Sentences Christa Bhatt, Elisabeth Löbel, Claudia Maria Schmidt, 1989-01-01 The main topic of this volume is the phrase structural analysis of noun phrases and sentences This analysis is based on recent ideas within the Government and Binding framework and makes crucial use of such modules as Theta assignment Binding Theory Case assignment as well as different definitions of the notion Barrier The ten papers deal with certain aspects of English and German noun phrases *English Noun Phrases from a Functional-Cognitive Perspective* Lotte Sommerer, Evelien Keizer, 2022-01-15 Despite a significant increase in interest over the last two decades in the English Noun Phrase there are still many open questions and unexplored issues The papers collected in this volume contribute to this ongoing research by addressing a range of topics concerning the internal structure use and development of English Noun Phrases The eleven chapters represent three main themes 1 Determination modification and complementation 2 Shell nouns and the X is construction 3 Binominal constructions These topics are approached in different ways some chapters are synchronic in nature others diachronic and while most subscribe to functional cognitive modelling some take a more formal approach In addition different methodologies are employed varying from qualitative and quantitative corpus analyses to experimental methods As a result the contributions to this volume represent both the main topics currently discussed in research on the English Noun Phrase and the diversity in the way these topics are investigated German: Syntactic Problems – Problematic Syntax Werner Abraham, Elly van Gelderen, 2017-10-10 The volume assembles eleven articles presenting a linguistic approach to the grammar of German English and the diachronic forerunners of English Common to all is a theoretical discussion against the background of Chomskyan minimalism 1993 and more recent developments of it Kayne 1993 Chomsky 1995 all of which make language typology comparisons an interesting proposition Some of the articles are critical of certain aspects of these theoretical approaches For all their claims to descriptive universality it transpires that they fail to address a number of features specific to German **Syntax, semantics, and the lexicon** Łukasz Jędrzejowski, Uwe Junghanns, Kerstin Schwabe, Carla Umbach, 2025-05-20 This book is dedicated to Ilse Zimmermann who was a pioneer of Generative Grammar in Germany and made important contributions to the analysis of German and Slavic languages It contains original articles by Zimmermann as well as newly written papers inspired by her work Zimmermann's original articles cover a wide range of topics over a long period of research the earliest dating from 1983 and they make it clear that issues that are highly topical today have long been the subject of linguistic research The newly written papers are closely related to Zimmermann's topics ranging from DP structure verbal inflection and reciprocity to the modification of causative verbs all from a Slavic perspective They are rounded off by a contribution highlighting the leading role played by the Strukturelle Grammatik research group of which Zimmermann was a member in the development of linguistics in Germany Dieses Buch ist Ilse Zimmermann gewidmet die eine Pionierin der Generativen Grammatik in Deutschland war und wichtige

Beiträge zur Analyse des Deutschen und der slawischen Sprachen geleistet hat. Es enthält sowohl Originalartikel von Zimmermann als auch neu verfasste Beiträge, die durch ihre Arbeit inspiriert wurden. Zimmermanns Originalartikel decken ein breites Spektrum von Themen in einem langen Forschungszeitraum ab, der frühestens datiert aus dem Jahr 1983 und sie machen deutlich, dass Fragen, die heute hochaktuell sind, schon lange Gegenstand der linguistischen Forschung sind. Die neu verfassten Kapitel stehen in engem Zusammenhang mit Zimmermanns Themen. Sie reichen von der DP-Struktur über verbale Flexion und Reziprozität bis hin zur Modifikation kausativer Verben, alles aus slawischer Perspektive. Abgerundet werden sie durch einen Beitrag, der die führende Rolle der Forschungsgruppe Strukturelle Grammatik, deren Mitglied Zimmermann war, für die Entwicklung der Linguistik in Deutschland hervorhebt.

Syntax of Dutch: Nouns and Noun Phrases - Volume 2 Hans Broekhuis, Marcel Dikken, 2025-10-01. The Syntax of Dutch will be published in at least seven volumes in the period 2012-2016 and aims at presenting a synthesis of the currently available syntactic knowledge of Dutch. It is primarily concerned with language description and not with linguistic theory and provides support to all researchers interested in matters relating to the syntax of Dutch, including advanced students of language and linguistics. The two volumes Nouns and Noun Phrases discuss the internal make-up as well as the distribution of noun phrases. Topics that will be covered include complementation and modification of noun phrases, properties of determiners, article demonstratives, numeral and quantifiers, the use of noun phrases as arguments, predicates and adverbial modifiers.

Possessors, Predicates and Movement in the Determiner Phrase Artemis Alexiadou, Chris Wilder, 1998-10-15. This volume presents a cross-section of current research on the internal syntax of Determiner Phrases (DPs) with special emphasis on the analysis of DPs modified by genitival adjectival and other non-finite attributes. Possessors, Predicates and Movement in the DP illustrates clearly the ongoing debate over older and more recent approaches to the syntax of DPs, in particular in the wake of the minimalist program (Chomsky 1995) and Kayne's antisymmetry hypothesis (Kayne 1994). The relative theoretical coherence among the contributions permits detailed comparison of specific syntactic proposals, providing a solid basis for further debate. Several of the papers address the syntactic questions in parallel with related semantic or morphological issues. The value of this collection to the study of Universal Grammar is also underlined by its comparative bias. Analyses of Germanic, Romance and Balkan languages figure prominently, and a number of new empirical generalizations within and between languages are discussed.

Syntactic Aspects of Topic and Comment André Meinunger, 2000-10-20. The book focuses on the syntactic behavior of argument noun phrases depending on their discourse status. The main language of consideration is German, but it is shown that the observations can be carried over to other languages. The claim is that discourse new arguments remain inside the VP, where they are base-generated. The hierarchy of argument projection is claimed to be fixed within and across languages. With the major attention to direct objects, it is then argued that discourse-old, here called topical noun phrases, undergo raising to agreement projections. This movement can be realized differently: scrambling, object agreement, clitic doubling, differences in

morphological case and stress pattern turn out to be analyzable as one underlying phenomenon It is furthermore shown that many so called subject object asymmetries boil down to topic non topic differences for example with respect to extraction Thus irrespectively of the argumental status discourse new constituents do not act as barriers whereas topical arguments create weak islands

Nominalizations, Double Genitives and Possessives Anja Šarić, 2018-10-22 The goal of this work is twofold First it aims to account for double genitive constructions in Serbian Second it aims to re evaluate the DP hypothesis in light of their existence in Serbian Based on evidence from the categorial status of possessives argumenthood in the nominal domain the morphosyntactic structure of nominalizations and the assignment of the genitive case it is argued that DP projection must be assumed in Serbian

The Semantics of Prepositions Cornelia Zelinsky-Wibbelt, 2011-09-06 No detailed description available for The Semantics of Prepositions

Balkan Syntax and Semantics Olga Mićeska Tomić, 2004-01-01 The book deals with some syntactic and semantic aspects of the shared Balkan Sprachbund properties In a comprehensive introductory chapter Tomić offers an overview of the Balkan Sprachbund properties Sobolev displaying the areal distribution of 65 properties argues for dialect cartography Friedman on the example of the evidentials argues for typologically informed areal explanation of the Balkan properties The other contributions analyze specific phenomena polidefinite DPs in Greek and Aromanian Campos and Stavrou Balkan constructions in which datives combine with impersonal clitics or non active morphology Rivero Balkan optatives Ammann and Auwera imperative force in the Balkan languages Isac and Jakab clitic placement in Greek imperatives Bošković focused constituents in Romanian and Bulgarian Hill synthetic and analytic tenses in Romanian D Hülst Coene and Avram purpose like modification in a number of Balkan languages Bučarovska Balkan modal existential wh constructions Grosu child and adult strategies in interpreting empty subjects in Serbian Croatian Stojanović and Mareš conditional sentences in Judeo Spanish Montoliu and Auwera
