

Aspectual Interpretation in Spanish of Adverb-Modified Verbal Forms*

Maria Martínez-Arizna
University of Castilla-La Mancha

Summary

García Fernández (2000a) showed that compound forms of Spanish verbs can express what in the literature is known as “Continuative Perfect”, and held that this aspectual variety focalises an event from its beginning until an internal point, without focalising its end. He further proposed a classification of aspectual varieties whose first and foremost division was that between conclusive and inconclusive events. Imperfect and Continuative were regrouped within the first division, Continuative being considered as an aspectual variety different from the Perfect. The aim of the present paper is, in the first place, to cover the possible morphological expressions of the Continuative and study which ones are shared with the imperfect aspect. We will later establish the restrictions imposed upon them by the different *Adverbios*. We will furthermore analyze the relationships between the Continuative and the imperfect aspect variety called “continuous”, and, lastly, we will provide an explanation for the obligatory use of certain adverbial complements in the Continuative’s expression.

*. A shorter version of this paper, written in collaboration with Luis García Fernández, was presented in October 2001 in Munich at the 27th German Conference on Romance Languages, *Linguistic paper 1: Verbal Periphrasen 1*. I wish to thank in his name and in mine all the comments and suggestions, especially the ones made by Daniel Borjesson and Brenda Laca. This paper was supervised by Luis García Fernández, to whom I am greatly indebted. Needless to say, all the errors are mine.

This paper has benefited from the project *Flengas y aspectos en la flexión verbal*, supported by the Ministry of Science and Technology, ref. BFF2001-1214 and by the Vice-Chancellor’s Office of the University of Castilla-La Mancha.
