The Love Machine:

The Studio John Gregory Dunne, 1998-04-14 In 1967 John Gregory Dunne asked for unlimited access to the inner workings of Twentieth Century Fox. Miraculously he got it. For one year Dunne went everywhere there was to go and talked to everyone worth talking to within the studio. He tracked every step of the creation of pictures like *Dr. Dolittle*, *Planet of the Apes*, and *The Boston Strangler*. The result is a work of reportage that thirty years later may still be our most minutely observed and therefore most uproariously funny portrait of the motion picture business. Whether he is recounting a showdown between Fox's studio head and two suave shark-like agents watching a producer's girlfriend steal a silver plate from a restaurant or shielding his eyes against the glare of a Hollywood premiere where the guests include a chimp in a white tie and tails, Dunne captures his subject in all its showmanship, savvy, vulgarity, and hype. Not since F. Scott Fitzgerald and Nathanael West has anyone done Hollywood better. Reads as easily as a novel. Dunne has a novelist's ear for speech and eye for revealing detail. Anyone who has tiptoed along those corridors of power is bound to say that Dunne's impressionism rings true. *Los Angeles Times*

Midnight Whims Cody Duckworth, 2012-08-24 *Midnight Whims* is a collection of short stories, poems, and one-act plays combining dark humor and surrealism with themes of angst, loneliness, and absurdity. From love machines and jaguars to bizarre family dinners, this collection recalls stories of desperate people, strange places, and hilarious situations.

Harold Robbins Andrew Wilson, 2011-01-15 During his fifty-year career, Harold Robbins, the godfather of the airport novel, sold approximately 750 million copies of his books worldwide. His seventh novel, *The Carpetbaggers*, a steamy tale of sex, greed, and corruption loosely based on the life of Howard Hughes, is the fourth most read book in history. As decadent as his fiction was, however, his life was just as profligate. Over the course of his five-decade career, Robbins spent money as quickly as he earned it, reportedly wasting away 50 million on everything from booze and drugs to yachts and prostitutes. Based on extensive interviews with family members and friends, including Larry Flynt and Barbara Eden, Harold Robbins examines the remarkable life of the man who gave birth to the cult of the modern bestseller and introduced sex to the American marketplace.

Heart of the Machine Richard Yonck, 2020-02-11 For Readers of Ray Kurzweil and Michio Kaku a New Look at the Cutting Edge of Artificial Intelligence. Imagine a robotic stuffed animal that can read and respond to a child's emotional state, a commercial that can recognize and change based on a customer's facial expression, or a company that can actually create feelings as though a person were experiencing them naturally. *Heart of the Machine* explores the next giant step in the relationship between humans and technology: the ability of computers to recognize, respond to, and even replicate emotions. Computers have long been integral to our lives and their advances continue at an exponential rate. Many believe that artificial intelligence equal or superior to human intelligence will happen in the not too distant future; some even think machine consciousness will follow. Futurist Richard Yonck argues that emotion, the first, most basic and most natural form of communication, is at the heart of how we will soon work with and use computers. Instilling emotions into computers is the next leap in our centuries-old obsession with creating machines that replicate humans. But for every benefit this progress may bring to our lives, there is a possible pitfall. Emotion recognition could lead to advanced surveillance, and the same technology that can manipulate our feelings could become a method of mass control. And as shown in movies like *Her* and *Ex Machina*, our society already holds a deep-seated anxiety about what might happen if machines could actually feel and break free from our control. *Heart of the Machine* is an exploration of the new and inevitable ways in which mankind and technology will interact. The paperback edition has a new foreword by Rana el Kaliouby, PhD, a pioneer in artificial emotional intelligence as well as the cofounder and CEO of Affectiva, the acclaimed AI startup spun off from the MIT Media Lab.
