Interviewer: Welcome to *Business Today*, a program for young entrepreneurs. Today our guest is Amanda Burns, who has an idea for starting her own business. Amanda, Welcome.

Entrepreneur Amanda Burns: Thank you for having me.

Interviewer: Well, let's jump in. What is your business idea?

Burns: Well, I want to focus on style and high fashion in wearable technology. Nice accessories for fashionable people who want to be healthy, and also look great. I see a big market out there.

Interviewer: Sounds like you have vision. Please explain a little more.

Burns: Sure, for example, we have a very fashion forward bracelet—with a fitness tracker to track steps, distance, calories burned, heart rate, and so on. Plus a stress monitor, so that the wearer can track both physical health and their mental health.

Interviewer: Other companies sell fitness trackers. What would make your business unique?

Burns: My products will look fantastic, not just track. People will love to wear them. My target market is 18- to 35-year-olds. The health and fashion-conscious group.

Interviewer: Have you thought about using an online fund-raising site, like Kickstarter?

Burns: Definitely. Kickstarter is a great way to raise awareness about a new product. Get people interested in buying it.

Interviewer: Do you have a name for your company yet?

Burns: I'm still working on ideas.

Interviewer: Good luck to you. Thanks for coming in today.

FOCUS your attention page 35

Speaker: Good afternoon. Today we're going to talk about how to start a small business. First I want to focus on creating a business plan. A detailed business plan is essential once you have an idea for a business. After I talk about the business plan, I intend to talk about building a website to test the idea for the business. You need to find out what other people think of your idea. Both of these steps are essential to start a small business. All right, so now let's get started. Before we can create a business plan, we need an idea for a business. Who has an idea for what people might want or need?

WATCH the lecture page 36

Professor Nancy Lee: EO1 Hi. Today we're going to talk about how to succeed in today's economy. Of course, we all know that education is only one component of success. But being successful is not just about education. Today we're going to talk about what else is needed to be successful in today's economy. EO2 I plan to divide my lecture into two main parts. First, I want to survey the current business environment. Second, I'd like to outline the attributes needed in order to be successful in today's economy. OK? Let's get started. (COACHING TIP 1) EO3 When we talk about "today's economy," what do we mean? (COACHING TIP 2) Well, basically we're referring to a global system of people, resources, and ideas. This means that everything is connected—interrelated. Conditions change rapidly—all the time. We call this a "VUCA" environment. That's V-U-C-A. V is for volatility. U-uncertainty. C-complexity, and A-ambiguity. Let's look at these one by one. EO4 V. Volatility. Volatility means the economy is likely to change suddenly. It may change in unpredictable ways. We don't know how or when the change will come. For example, the price of a barrel of oil might go up 20 percent in one day—this shows that the energy market is "volatile." EO4a Then there is U. Uncertainty. We don't have all the information we want or need. We can't control events. We can't predict how everyone will react. For example, a while back, Google launched Google Glass—you know, the wearable gadget that fits over your eyes. It seems like you can see a secret world! Google thought it was a great product. They believed that consumers would love it. But the reaction was mixed. Why? Around that same time, the public was getting nervous about privacy. The company had no way of knowing that consumers would react this way. Consumer response is like the weather. It's uncertain. (COACHING TIP 3) EO4b And then there is C. Complexity. Business problems are often caused by a number of diverse factors. For example, a company may have a problem in a foreign country because of customs or cultural values the company did not understand. For example, a large US retailer, Walmart, recently tried to open a chain of stores in Germany. Walmart used their successful US model. They had cheap prices, very large stores, and long store hours. But it didn't work as well as they had hoped. They discovered that Germans generally don't trust low-priced products, they don't like large stores, and they don't want to go shopping at midnight. The process of opening a chain of stores was more complex than they thought. EO4c And finally, there's Ambiguity. Ambiguity means things are
