

Chapter 1

Amazing Machines

Imagine a machine that can do everything that humans do. It might move around, talk, hold tools, and solve puzzles. Now imagine the same machine, or maybe many different ones, which together can do everything we need. Perhaps these machines could do anything humans do—and do some things even better!

They do the washing, the cooking, building and repair work.

They run the car, fly the planes, look after us when we're sick, teach lessons at school, and even write books.

Changing technology

This might sound like an idea from the future, but in fact, people have been dreaming of helpful machines like this for hundreds, even thousands, of years. All new inventions, from the wheel to the phone, were created to make life easier in some way by having a machine do a job for us.

Machines and tools are examples of **technology**. Technology is a big idea—it means that we humans use what we know about the world to invent useful things.

As we learn more about the world, we can make better, smarter inventions and **gadgets** (a gadget is any small and useful device). Once upon a time, the spoon was a new gadget, as was the window, the shoe, or pen and paper.
