

THE ROMANTIC AGE

The period between 1789 and 1794 includes a revolt against the old social order in France with the abolition of the monarchy and the diffusion of the main idea of the French revolution: "equality, fraternity liberty". It was followed by Robespierre's reign of terror and then Napoleone. The second half of the 18th century was an age of revolutions:

- George III came to the throne in 1760 →
- To reduce the public debt due to the seven years war, the king introduced **new duties** on **corn, paper** and **tea** which caused fierce opposition in the American colonies
- The Parliament responded to the protest by **repealing** some of them, but the tax on imported tea remained.
- Many colonies began to think that they should only taxes approved by their local governing assemblies → at the Boston tea party in 1773 some rebels, dressed as native Americans, threw the British tea coming from other part of the British empire, India into the garbage.
- They said: "no taxation without representation" because they were colonies of the British government and so they wanted to become independent.

The Americans were divided into:

- PATRIOTS= people who wanted independence
- LOYALISTS= people who wanted to remain part of Britain.

The war of independence started in 1775, the army was commanded by George Washington and in 1776 in Philadelphia the congress made by the representatives from the 13 colonies, signed the **Declaration of Independence**. It claimed that all men had a natural right to life, liberty, and the pursuit of happiness. In 1781, at the battle of Yorktown, the British army was defeated and Britain recognised the independence of its colonies with the Treaty of Versailles in 1783.

The new republic of the USA adopted a federal Constitution and George Washington became the first president in 1789. He also became prime minister and he tried to simplify the financial system and reduce the national debt.

THE INDUSTRIAL REVOLUTION

It is referred to a social and **economic change**. The causes of this revolution were:

- Country transformed from an agricultural to an industrialised nation
- New discoveries and inventions
- A lot of people moved from the countryside to the city → the increase of people who lived in the cities and this towns were called "mushrooms towns".

The population increased, the agriculture was inspired, the soil was drained and made more fertile, animals were bred selectively. There was a succession of technological innovations that transformed and improved the productivity of workers. It was invented a steam engine, which made pumping water out of coal mines and innovation became linked to energy generated from coal. The air and the water were polluted by smoke and filth, women and children were highly prized by employers because they could be paid less and were easier to control.
