The Modern Functional Building:

The Modern Functional Building Adolf Behne,1996 Bruno Taut and Walter Gropius organized the Arbeitsrat für Kunst Work council on the arts Behne would also become an early critic of both the Werkbund and the Bauhaus Written in 1923 Behne's Modern Functional Building clarifies the concepts of German Modernism at their very inception especially the crucial distinctions between functionalism rationalism and utilitarianism In this text Behne advocates a functionalism that is not technocentric but is comparable

Machines for Living Victoria Rosner,2020-02-04 Changes in the routines of domestic life were among the most striking social phenomena of the period between the two World Wars when the home came into focus as a problem to be solved re imagined streamlined electrified and generally cleaned up Modernist writers understood themselves to be living in an epochal moment when the design and meaning of home life were reconceived Moving among literature architecture design science and technology Machines for Living shows how the modernization of the home led to profound changes in domestic life and relied on a set of emergent concepts including standardization scientific method functionalism efficiency science and others that form the basis of literary modernism and stand at the confluence of modernism and modernity Even as modernist writers criticized the expanding reach of modernization into the home they drew on its conceptual vocabulary to develop both the thematic and formal commitments of literary modernism Rosner's work develops a new methodology for interdisciplinary modernist studies and shows how the reinvention of domestic life is central to modernist literature

Participatory Design and Self-building in Shared Urban Open Spaces Carolin Mees,2018-04-12 The book investigates the development of community gardens with self built structures which have existed as a shared public open space land use form in New York City's low income neighborhoods like the South Bronx since the 1970s These gardens have continued to be part of the urban landscape until today despite conflicting land use interests changing residents groups and contradictory city planning Both community gardens and self built structures are created in a participatory design and self built effort by urban residents and are an expression of the individual gardeners preferences their cultural background and the decisions made by the managing residents group in regards to the needs of their neighborhood Ultimately community gardens with self built structures are an expression of the people's will to commonly use this land for open and enclosed structures next to their homes in the city and need to be included in future urban planning

Photography, Architecture, and the Modern Italian Landscape Lindsay Harris,2024-11-19 Photography Architecture and the Modern Italian Landscape explores the impact of photography at a pivotal moment in Italian architecture and culture focusing on the period between 1910 and the mid 1970s The book analyzes architectural photographs taken by Italian cultural figures who helped transform the Italian landscape into what we know today This study charts the oscillation of Italians ideas about what progress signified For example the book demonstrates that for writers and artists familiar with ancient ideas about civilization in 1910 the Roman countryside exemplified the contradictions inherent in

primitivism On the one hand their photographs praised the region's primordial beauty yet their images condemned the crudeness of local living conditions More broadly it traces the history of primitivism and photography in Italy to show how cultural leaders alarm at the nation's pre-modern living conditions their aspiration to modernize them and their grasp of photography to catalyze the process helped forge the modern Italian landscape its monuments housing infrastructure and natural environments At the same time it explores a vibrant period in photographic history when the advent of photographic reproduction as a commercial process developed into a medium with its own visual style capable of shaping ideas about modernity This new image making and reproduction technology empowered Italy's cultural leaders not simply to represent the Italian landscape through photography but to determine how it developed Of interest to researchers and students from a range of disciplines modern architecture photography and Italian studies this book demonstrates the power of art to transform society and to reformulate our ideas of progress American Architectural History Keith Eggener, 2004-07-31 This major new text presents a collection of recent writings on architecture and urbanism in the United States with topics ranging from colonial to contemporary times In terms of content and scope there is no collection in or out of print directly comparable to this one The essays are drawn from the past twenty years of publishing in the field arranged chronologically from colonial to contemporary and accessible in thematic groupings contextualized and introduced by Keith Eggener Drawing together 24 illustrated essays by major and emerging scholars in the field American Architectural History is a valuable resource for students of the history of American art architecture urbanism and material culture **Frank Lloyd Wright** Anthony Alofsin, 1999-10-26 Interwoven in the essays are stories of champions and critics rivals and acolytes books and exhibitions attitudes toward America and individualism and the many ways Wright's ideas were brought to the world Together the essays represent a first look at Wright's impact abroad some from the perspective of natives of the countries discussed and others from that of informed outsiders **BOOK JACKET** **Functional Planning of Elementary School Buildings** Alice Barrows, 1937 **The Historiography of Modern Architecture** Panayotis Tournikiotis, 2001-02-27 The history of modern architecture as constructed by historians and key texts Writing according to Panayotis Tournikiotis has always exerted a powerful influence on architecture Indeed the study of modern architecture cannot be separated from a fascination with the texts that have tried to explain the idea of a new architecture in a new society During the last forty years the question of the relationship of architecture to its history of buildings to books has been one of the most important themes in debates about the course of modern architecture Tournikiotis argues that the history of modern architecture tends to be written from the present projecting back onto the past our current concerns so that the beginning of the story really functions as a representation of its end In this book the buildings are the quotations while the texts are the structure Tournikiotis focuses on a group of books by major historians of the twentieth century Nikolaus Pevsner Emil Kaufmann Sigfried Giedion Bruno Zevi Leonardo Benevolo Henry Russell Hitchcock Reyner Banham Peter Collins and Manfredo Tafuri

In examining these writers thoughts he draws on concepts from critical theory relating architecture to broader historical models

Objects in Exile Robin Schuldenfrei,2024-01-23 An essential examination of how emigration and resettlement defined modernism In the fraught years leading up to World War II many modern artists and architects emigrated from continental Europe to the United States and Britain The experience of exile infused their modernist ideas with new urgency and forced them to use certain materials in place of others modify existing works and reconsider their approach to design itself In *Objects in Exile* Robin Schuldenfrei reveals how the process of migration was crucial to the development of modernism charting how modern art and architecture was shaped by the need to constantly face and transcend the materiality of things Taking readers from the prewar era to the 1960s Schuldenfrei explores the objects these migr s brought with them what they left behind and the new works they completed in exile She argues that modernism could only coalesce with the abandonment of national borders in a process of emigration and resettlement and brings to life the vibrant postwar period when avant garde ideas came together and emerged as mainstream modernism Examining works by Walter Gropius L szl Moholy Nagy Lucia Moholy Herbert Bayer Anni and Josef Albers and others Schuldenfrei demonstrates the social impact of art objects produced in exile Shedding critical light on how the pressures of dislocation irrevocably altered the course of modernism *Objects in Exile* shows how artists and designers forced into exile by circumstances beyond their control changed in unexpected ways to meet the needs and contexts of an uncertain world

The Socialist Life of Modern Architecture Juliana Maxim,2018-12-07 *The Socialist Life of Modern Architecture* is the first systematic architectural history of Romania under socialism written in English It examines the mechanisms through which modern architecture was invested with political meaning and in reverse how specific architectural solutions came to define the socialist experience Each of the book s three parts traces the historical development of one key aspect of Romania s architectural culture between the years 1949 1964 the planning and construction of housing districts in Bucharest the role of typification of design and standardization of construction in a project of cultural transformation the production and management of a folk architectural tradition Going beyond buildings and architects to consider the use of photography painting and novels as well as narrations of history and the formation of an ethnographic architectural heritage the author explores how buildings came to participate in the cultural imagination of socialism and became in fact a privileged medium of socialism Part of the growing interest in the significance of Soviet Bloc architecture this is an important contribution to the fields of architectural history cultural history and visual culture
