The Moscow Papers:

An International Annotated Bibliography of Strindberg Studies 1870-2005: General studies Michael Robinson, 2008 This copiously annotated bibliography documents and examines the whole range of commentary on Strindberg's works and activity in many fields besides the plays for which he is internationally best known. These include his prose fiction and poetry, his work as an historian and natural historian and his relationship to the other arts, most notably his painting. It is concerned with both lasting works of literary and dramatic criticism as well as reviews of his books and plays in the theatre and some more ephemeral material, all of this in several languages. Organised generically and by subject and individual work, the bibliography enables the reader to trace the changing impact of Strindberg and his works in various countries and during different periods. It is thus very much a study in reception as well as a bibliographical record of published material. It traces the developing image of Strindberg and his writing both during his lifetime and in subsequent years and with frequent cross reference offers a comprehensive overview of a literary and existential project that has rarely been matched for its multifaceted diversity. The bibliography is published in three parts: Volume 2 The Plays 978 0 947623 82 1 and Volume 3 Prose Poetry Miscellaneous 978 0 947623 83 8 are also now available. Michael Robinson is Emeritus Professor of Drama and Scandinavian Studies at the University of East Anglia, Norwich. Papers Relating to the Foreign Relations of the United States United States. Nuclear Papers David Owen, 2009-01-01 This timely book, published in advance of 2010's inter-governmental Review Conference of the Treaty on the Non-Proliferation of Nuclear Weapons, makes available for the first time newly declassified government correspondence from David Owen's tenure as Foreign Secretary. Nuclear Papers gives new insight into the work of and response to the last major strategic nuclear study of the UK's nuclear needs which was undertaken in 1978. The book demonstrates sustained dialogue between the Callaghan and Carter administrations on the one hand but also the internal disputes and concerns of the UK government as the Cold War and a bleak economic outlook exerted equal pressures in much the same way as recent foreign policy and the economic downturn have challenged the current government. Owen skilfully ties the events of 30 years ago to the present, highlighting Barack Obama's determination to show the world that America believes in its existing commitment under the Nuclear Non-Proliferation Treaty to work ultimately to eliminate all nuclear arms. As ever, David Owen is at the forefront of debate, arguing convincingly that momentum should be established towards the elimination of nuclear weapons by all five of the existing declared nuclear weapon states before the 2010 NPT Review Conference gets underway. This book then is an attempt to rejuvenate and expand discussions of the future of the world's nuclear weapons by exploring the classified and highly sensitive debates of the past. It will be required reading for anyone interested in UK and US nuclear policy.
