Sipri Yearbook 1993 World Armaments And Disarmament:

Sipri Yearbook 1993 Stockholm International Peace Research Institute, 1993 The SIPRI Yearbook 1993 continues SIPRI's review of the latest developments in nuclear weapons nuclear explosions world military expenditure the international arms trade and arms production chemical and biological weapons the military use of outer space the proliferation of ballistic missile technology armed conflicts in 1992 US Soviet nuclear arms control and conventional arms control in Europe The Evolution of Biological Disarmament Nicholas Roger Alan Sims, 2001 The evolution of the disarmament regime of the 1972 Biological and Toxin Weapons Convention BTWC is described from 1980 when the first BTWC Review Conference was held until 1998 The author analyses the results of our first four review Conferences the meetings of the Ad Hoc Group of Governmental Experts to Identify and Examine Potential Verification Measures from a Scientific and Technical Standpoint the 1994 Special Conference the current negotiations of the Ad Hoc Group to produce an additional protocol the BTWC which may include verification measures handling of the 1997 Cuban allegation of US biological warfare and the implementation of Article X of the BTWC on international transfers and cooperation for peaceful purposes The strength of the BTWC regime is assessed in the light of its evolution through the review process and its changing contents including Russia's admission that it had inherited an offensive biological weapon programme The book applies an original sector by sector approach to its analysis of the BTWC studied in a long term perspective **Arms Control and Security: The Changing Role of Conventional Arms Control in Europe** Kevin Wright, 2017-11-01 This title was first published in 2000 The aim of this text is to explore conventional arms control in Europe The early chapters provide a primarily historical perspective looking at the context foundations main provisions and institutional structure of the main agreements The later chapters explore the continuing and likely future roles of the OSCE and NATO in the arms control process The final chapters examine more contemporary developments by looking at the Adapted CFE Treaty and Vienna Documents agreed at the OSCE Istanbul Summit in November 1998 and the challenges posed to existing arrangements by the changing and emergent security threats that potentially face Europe **Weapons Proliferation and World Order** Brad Roberts, 2023-09-29 With the end of the Cold War the subject of weapons proliferation has acquired new interest and prominence So too have questions about the nature of the world order that will succeed the structure of the last fifty years This study explores the connections among these topics It describes the prevailing conceptual model of nuclear proliferation evaluates proliferation's changing technical features considers economic and political factors bearing on its future rate and character and speculates about proliferation's implications on the post cold war world order It also considers the role of international public policy in meeting proliferation's challenges Arguing that updated approaches are needed the analysis emphasizes cooperative over coercive approaches to order It concludes with an assessment of progress to date in meeting these new challenges arguing that the new agenda is only slowly coming into focus **The Global Spread Of Arms** Frederic S Pearson, 2018-02-19 This book surveys the broad

terrain covered by the concept of the security dilemma and points out landmarks along the route proceeding from proliferation to economic interests showing that the arms trade is built into development of both industrial technology and political competition Realism versus Global Arms Control and Disarmament Carmen Chas, 2025-07-15 This incisive book explores the limits of international law through arms control and disarmament treaties Carmen Chas critically engages with literature on disarmament and classical realist analysis bridging the divide between international law and international relations scholarship **Doing Justice** Leroy H. Pelton, 1999-04-29 Offering a new way of thinking about liberalism and public policies this book contends that group based policies predicated on all manner of group construction pervade public policy Such policies are grounded in group distinctions that include not only race ethnicity gender and age but current and past behavior employment status personal preferences and numerous statistical and inferential factors Although many of these policies are considered to be liberal they are all discriminatory in essence For example the Social Security Act of 1935 although regarded as the foundation of modern liberalism is riddled with group based policies that are inconsistent with the principle of nondiscrimination This book examines other examples of group based discrimination in such diverse areas as public welfare and child welfare drug and gambling laws drunk driving laws criminal justice and foreign policy Pelton argues that the true roots of liberalism are found in nondiscrimination and respect for the individual Doing Justice proposes just that nondiscriminatory individual oriented policies in place of each of the group based policies that are analyzed The book s innovative thesis points to a conceptual and political rebirth of liberalism **European Security** Bjørn Møller, 2016-04-22

Europe has undergone quite profound changes since the end of the Cold War Having been a highly militarised conflict ridden and war ridden region the core of Europe today constitutes a security community where armed conflicts among the constituent states has become inconceivable This comprehensive book offers a theoretically founded and thoroughly documented analysis of European security with a special emphasis on the role played by the United Nations and the various regional and sub regional organisations especially the North Atlantic Treaty Organisation the Organisation for Security and Cooperation in Europe the Council of Europe and the European Union When it comes to explaining peace in Europe opinions differ widely Some argue that it was only because the West refused to give in to Soviet threats that the latter eventually gave up or that the long peace in Europe was due to the combination of a bipolar alliance structure pitting the North Atlantic Treaty Organisation NATO against the Warsaw Pact with the presence of nuclear weapons on both sides Others point instead to the extraordinarily dense network of international institutions and organisations in Europe offering a wide panoply of fora in which to handle disputes peacefully or to the web of interdependence in economic and other affairs tying together all states in Europe in relations which militate strongly against war Still others believe that the external peace between the states in Europe is simply a reflection of a convergence of cultures democracies with marked economies that are open towards the world market These questions are the focal point of this book which concentrates on security albeit not in the

sense of being a treatise on military matters but security obtainable by much more indirect and non military means It will be required reading for all students and scholars of European security and the organisations which underpin it *Southeast Asian Security in the New Millennium* Richard J. Ellings, Sheldon W. Simon, 2016-09-16 Assessing trends toward creating innovative forms of political economic and security co operation in Southeast Asia this text discusses the international dynamics of Southeast Asian security and its impact on such external factors as the US China and Japan *The Oxford Handbook of the International Law of Global Security* Robin Geiß, Nils Melzer, 2021-02-16 Understanding the global security environment and delivering the necessary governance responses is a central challenge of the 21st century On a global scale the central regulatory tool for such responses is public international law But what is the state role and relevance of public international law in today s complex and highly dynamic global security environment Which concepts of security are anchored in international law How is the global security environment shaping international law and how is international law in turn influencing other normative frameworks The Oxford Handbook of the International Law of Global Security provides a ground breaking overview of the relationship between international law and global security It constitutes a comprehensive and systematic mapping of the various sub fields of international law dealing with global security challenges and offers authoritative guidance on key trends and debates around the relationship between public international law and global security governance This Handbook highlights the central role of public international law in an effective global security architecture and in doing so addresses some of the most pressing legal and policy challenges of our time The Handbook features original contributions by leading scholars and practitioners from a wide range of professional and disciplinary backgrounds reflecting the fluidity of the concept of global security and the diversity of scholarship in this area **Nuclear Non-proliferation and Global Order** Harald Müller, David Fischer, Wolfgang Kötter, 1994 This book presents different views on nuclear disarmament and arms control and a brief history of nuclear non proliferation policy and the nuclear test ban issue It describes the preparations for and results of the 1990 Non Proliferation Treaty Review Conference and the 1991 Partial Test Ban Treaty Amendment Conference With a view to 1995 it assesses the chances for consensus or dissension regarding regarding nuclear proliferation and the test ban and the prospects for an extension of NPT It concludes by examining the future and the threat of a new North South divide over these issues Managing Intercollective Conflict Anna J. Borgeryd, 1999-02 How does the state system measure up to today s realitites when it comes to managing conflict To what extent are efforts to manage conflict successful and for whom Prevailing structures designed to deal with conflict between collectives sovereign states supported by militaries military industry and the United Nations operate mainly on principles that are hundreds of years old Conditions for conflict and its management have changed radically since this state system was constructed There is a risk that institutional inertia produces growing disparity between real world problems and the institutions that are supposed to manage them Realism and legalism are found to form a double idological support for the

state system The study compares the state system's realist and legalist premises to different cases of post cold war intercollective conflict the 1990-91 Gulf War the 1990-95 break up of Yugoslavia and the 1992 Los Angeles riots These cases present important challenges to the prevailing system's premises mismatches between idea and reality that are clearly connected to failures in conflict management In addition findings suggest that the state system not only fails to deal with important aspects of modern day conflict but that it increasingly produces problems that it cannot manage This suggests that the prevailing state system is not in harmony with crucial conflict related aspects of global impact indicating a serious systemic problem

The Modern Defense Industry Richard A. Bitzinger, 2009-10-15 Whether it's guns and ammunition or multidimensional anti terrorism systems the defense industry is dynamic complex and ubiquitous It is also mysterious powerful and controversial involving thousands of players worldwide from suppliers and producers to government and military procurers to shadowy figures that trade in the black market This comprehensive two volume reference will explore on a global scale the various issues concepts problems and controversies surrounding the rise of the modern defense industry Unparalleled in its scope and insight The Modern Defense Industry will prove invaluable to the industry's critics and champions alike The phenomenon of a more or less permanent defense industry especially one so wide in scale breadth air sea land and space technology and geography is still relatively new Until now its implications for politics economics and technology have not been adequately discussed in an authoritative accessible format for scholars and researchers business people journalists policymakers and interested laymen The Modern Defense Industry addresses the period from 1945 to the present covering the United States Europe Russia China Israel and other important arms producing and arms procuring countries Including essays by experts from around the world a glossary data on firms and governments laws and policies primary documents case studies and a host of other elements this set will be a unique resource for anyone interested in the arms industry It will also offer penetrating insights into topics like international relations and diplomacy arms proliferation and contemporary politics Volume I comprises chapters by experts in the field on topics like the relationship between the industry military and government how new modes of warfare are changing the industry the implications of globalization on the industry the black and gray areas of the arms trade and much more Volume II features an extensive A-Z glossary of terms lists of defense firms and government agencies annotated primary documents lists of leading defense contractors and key weapons systems an analysis of key legislation and professional organizations The Modern Defense Industry sets the standard for state of the art overviews of an industry that has for better or worse come to infuse nearly every aspect of world affairs in the early twenty first century

Protracted Contest John W. Garver, 2001 Drawing upon interviews with key figures who have shaped the diplomatic history of China and India as well as the extensive record of government documents and media reports Garver offers a scrupulous examination of the Sino Indian relationship over the last 50 years

Between Sovereignty and Global Governance? Albert J. Paolini, Christian Reus-Smit, Anthony P. Jarvis, 2016-07-27 This book explores

the nature and problems of global governance as we enter the next millennium It focuses on the United Nations the most ambitious experiment to date in multilateral management of world society Leading scholars policy makers and representatives of non governmental organizations examine the economic security and civil political dimensions of governance exploring the impact of changing global conditions on national regional and international institutions and processes of governance They use the experience of the United Nations system to illuminate the nature and viability of sovereign and non sovereign forms of governance in an era of rapid political economic cultural strategic and ecological change

Sea-Dumped Chemical Weapons: Aspects, Problems and Solutions A.V. Kaffka, 2013-03-09 This volume summarises the materials presented at the NATO Advanced Research Workshop on Sea Dumped Chemical Munitions held in Kaliningrad Moscow Region Russia in January 1995 The conference was sponsored by the NATO Division of Scientific and Environmental Affairs in the framework of its outreach programme to develop co operation between NATO member countries and the Cooperation Partner countries in the area of disarmament technologies The problem of the ecological threat posed by chemical weapons CW dumped in the seas after the Second World War deserves considerable international attention the amount of these weapons many of them having been captured from the German Army is assessed at more than three times as much as the total chemical arsenals reported by the United States and Russia They were disposed of in the shallow depths of North European seas areas of active fishing in close proximity to densely populated coastlines with no consideration of the long term consequences The highly toxic material have time and again showed up for instance when retrieved occasionally in the fishing nets attracting local media coverage only Nevertheless this issue has not yet been given adequate and comprehensive scientific analysis the sea disposed munitions are not covered by either the Chemical Weapons Convention or other arms control treaties In fact the problem has been neglected for a long time on the international level Only recently were official data made available by the countries which admitted conducting dumping operations

Regional Conflicts

James E. Goodby, 1995 This is the second volume of a two part study on international issues in the post cold war era Ten authors consider regional conflicts how relations among the great powers could be affected by such conflicts and how co operation among the leading nations especially Russia and the United States might influence the course of regional strife The end of the cold war closed one chapter in history the global struggle between the USA and USSR It has not brought an end to regional conflicts This volume analyses three broad categories of regional conflicts Countries in the developing world where US and Russian interests are more or less equally engaged Countries of special interest to one or more of the great powers and Countries where there is no overriding Russian or US national security interest The challenge to US Russian co operation is examined under the major headings of preventive diplomacy in an era of high technology dilemmas of US Russian security co operation and international security organizations as instruments for great power co operation
