Situational Prison Control Richard K. Wortley, 2002-03-25 This book examines the control of problem behaviour in prison from a situational crime prevention perspective Following the success of situational crime prevention in community settings Richard Wortley argues that the same principles can be used to help reduce the levels of assault rape self harm drug use escape and collective violence in our prison systems This pioneering new study proposes a two stage model of situational prevention that moves beyond traditional opportunity reduction it attempts to reconcile the contradictory urges to control prison disorder by tightening up and hardening the prison environment on the one hand and loosening off and normalising it on the other Combining a comprehensive synthesis and evaluation of existing research with original investigation and ground breaking conclusions Situational Prison Control will be of great interest to academics and practitioners both in the areas of correction and crime prevention more generally

Prison Worlds Didier Fassin,2017-05-23 The prison is a recent invention hardly more than two centuries old yet it has become the universal system of punishment How can we understand the place that the correctional system occupies in contemporary societies What are the experiences of those who are incarcerated as well as those who work there To answer these questions Didier Fassin conducted a four year long study in a French short stay prison following inmates from their trial to their release He shows how the widespread use of imprisonment has reinforced social and racial inequalities and how advances in civil rights clash with the rationales and practices used to maintain security and order He also analyzes the concerns and compromises of the correctional staff the hardships and resistance of the inmates and the ways in which life on the inside intersects with life on the outside In the end the carceral condition appears to be irreducible to other forms of penalty both because of the chain of privations it entails and because of the experience of meaninglessness it comprises Examined through ethnographic lenses prison worlds are thus both a reflection of society and its mirror At a time when many countries have begun to realize the impasse of mass incarceration and question the consequences of the punitive turn this book will provide empirical and theoretical tools to reflect on the meaning of punishment in contemporary societies

Risk Terrain Modeling Joel M. Caplan, Leslie W. Kennedy, 2016-06-28
Risk terrain modeling (RTM) diagnoses the spatial attractors of criminal behavior and makes accurate predictions of where crime will occur at the micro level. This book presents RTM as part of a larger risk management agenda that defines and measures crime problems, suggests ways in which they can be addressed through interventions, proposes measures for assessing effectiveness of treatment, and sustainability of efforts, and offers suggestions for how police organizations can address vulnerabilities and exposures in the communities that they serve through strategies that go beyond specific deterrence of offenders. Technical and conceptual aspects of RTM are considered in the context of past criminological research, leading to a discussion of crime vulnerabilities and exposures and the Theory of Risky Places. Then, best practices for RTM crime prediction and risk reduction are set to ACTION. Case studies empirically demonstrate how RTM can be used to analyze the spatial dynamics of crime, allocate resources, and implement customized crime and risk reduction strategies that are transparent, measurable, and effective. Researchers and practitioners will learn how the combined factors that contribute to criminal behavior can be targeted; connections to crime can be monitored; spatial vulnerabilities can be assessed; and actions can be taken to reduce the worst effects.

Ethical Issues in Prison Psychiatry Norbert Konrad, Birgit Völm, David N. Weisstub, 2013-08-23
Recent surveys demonstrate a high and possibly increasing prevalence of mental disorders in prisoners. They have an increased risk of suffering from a mental disorder that transcends countries and diagnoses. Ethical dilemmas in prison psychiatry arise from resource allocation and include issues of patient choice and autonomy in an inherently coercive environment. Ethical conflicts may arise from the dual role of forensic psychiatrists, giving rise to tensions between patient care and protection of the public. This book describes models and ethical issues of psychiatric healthcare in prison in several countries. Relevant issues are the professional medical role of a psychiatrist and/or psychotherapist working in prison, the involvement of psychiatrists in disciplinary or coercive measures, consent to treatment, the use of coercion in forcing a prisoner to undergo treatment, hunger strike, confidentiality. The book ends with consensus guidelines concerning good practice in Prison Psychiatry.
