Textbook of Catheter-Based Cardiovascular Interventions Peter Lanzer, 2018-04-30 This book is a fully updated and revised second edition of a highly successful text in which a new concept of knowledge mining based on explication and transfer of interventional knowledge of experts has been implemented The dedicated training program that is set out will serve the needs of all interventional operators whether cardiologists vascular surgeons vascular specialists or radiologists enabling them to achieve a consistent expert level across the entire broad spectrum of catheter based interventions Operator

skills and in particular decision making and strategic skills are the most critical factors for the outcome of catheter based cardiovascular interventions. Currently such skills are commonly developed by the empirical trial and error method only. The explicit teaching training and learning approach adopted in this book permits the rapid transfer of interventional knowledge and enables individual operators to negotiate steep learning curves and acquire complex skills in a highly efficient manner. It will thereby offer invaluable assistance in meeting successfully the challenges of modern cardiovascular care.

Textbook of Practical Laparoscopic Surgery RK Mishra, 2013-02-28 Laparoscopic surgery is a minimally invasive technique whereby a small incision is made in the abdomen allowing a surgeon to look inside the body and perform certain operations. This comprehensive guide brings surgeons fully up to date with the latest procedures in laparoscopic surgery. Beginning with an introduction to the technique, equipment, sterilisation, dissection, suturing and anaesthesia, the following sections discuss general surgical procedures, gynaecological procedures, paediatric laparoscopy and laparoscopic urology. Each section describes numerous different procedures, with the final chapters discussing complications, training, robotic surgery, the future of laparoscopic surgery and more. This new edition includes more than 1220 colour images and illustrations and a DVD depicting surgical procedures. Key points. Comprehensive, fully updated guide to laparoscopic surgery. Discusses numerous procedures in general, gynaecological, paediatric and urological laparoscopic surgery. More than 1220 colour images and illustrations. Includes DVD of laparoscopic surgery procedures. Previous edition published in 2009.

Robot Motion and Control Krzysztof R. Kozłowski, 2006-07-26 Robot Motion and Control presents very recent results in robot motion and control. Twenty papers have been chosen and expanded from fifty three presented at the Fourth International Workshop on Robot Motion and Control held in Poland in June 2004. The authors of these papers have been carefully selected and represent leading institutions in this field. The following recent developments are discussed: Design of trajectory planning schemes for holonomic and nonholonomic systems with optimization of energy, torque limitations and other factors. New control algorithms for industrial robots, nonholonomic systems and legged robots. Different applications of robotic systems in industry and everyday life like medicine, education, entertainment and others. The book is suitable for graduate students of automation and robotics, informatics and management, mechatronics, electronics and production engineering systems as well as scientists and researchers working in these fields.

Computer Modeling in the Aerospace Industry Iftikhar B. Abbasov, 2019-12-12 Devoted to advances in the field of computer simulation of aerospace equipment, this study is the most up to date coverage of the state of the art on coastal and passenger aircraft, drones and other recent developments in this constantly changing field. This book is devoted to unique developments in the field of computer modeling in aerospace engineering. The book describes the original conceptual models of amphibious aircraft, ground effect vehicles, hydrofoil vessels and others from theory to the full implementation in industrial applications. The developed models are presented with the design of passenger compartments and are actually ready for implementation in the aircraft industry. The originality of

the concepts are based on biological prototypes which are ergonomic multifunctional and aesthetically pleasing The aerodynamic layout of prospective convertible land and ship based aircrafts of vertical and short takeoff landing is presented as well as the development of the original model of the unmanned aerial vehicle or drone The results of full scale experiments are presented including the technology of modeling aerospace simulators based on the virtual reality environment with technical vision devices Whether for the practicing engineer in the field the engineering student or the scientist interested in new aerospace developments this volume is a must have This groundbreaking new volume Presents unique developments of coastal aircraft concepts based on biological prototypes from the idea to the finished model Gives the process of modeling the original unmanned aerial vehicle Investigates aerospace simulators based on virtual reality environment with technical vision devices Covers the original ideas of creating carrier based aviation for sea ships and the results of field experiments simulating an unmanned aerial vehicle Provides many useful illustrations of naval aviation Audience The book is intended for aerospace engineers mechanical engineers structural engineers researchers and developers in the field of aerospace industry for aircraft designers and engineering students It will be useful for scientists students graduate students and engineers in the field of naval aviation and space simulators Scientific and Technical Books and Serials in Print ,1989 **Textbook of Laparoscopy for Surgeons and Gynecologists** RK Mishra,2021-12-31 Performed under general anaesthetic laparoscopy is a type of surgical procedure that allows a surgeon to access the inside of the abdomen and pelvis without having to make large incisions in the skin The procedure is also known as keyhole surgery or minimally invasive surgery This textbook is a complete guide to laparoscopic surgery for practising and trainee general and laparoscopic surgeons The fourth edition has been fully revised and features many new topics providing the latest advances in the field Divided into six sections the book begins with discussion on the fundamentals of laparoscopic surgery imaging systems instruments sterilisation anaesthesia and basic techniques The following sections cover numerous general surgical gynaecological and urological procedures A complete section is dedicated to paediatric laparoscopic surgery The book concludes with discussion on bariatric surgery complications of minimal access surgery training robotic surgery endoscopic microsurgery and future advances in the field The comprehensive text of 900 pages is further enhanced by surgical and clinical photographs and illustrations Key points Comprehensive guide to general gynaecological urological and paediatric laparoscopic surgery Fully revised fourth edition featuring new topics and advances in the field Highly illustrated with clinical and surgical photographs Previous edition 9789350259412 published in 2013
