Handbook of Integrative Developmental Science

Michael F. Mascolo, Thomas R. Bidell, 2020-03-20 Although integrative conceptions of development have been gaining increasing interest there have been few attempts to bring together the various threads of this emerging trend The Handbook of Integrative Developmental Science seeks ways to bring together classic and contemporary theory and research in developmental psychology with an eye toward building increasingly integrated theoretical and empirical frameworks It does so in the form of a festschrift for Kurt Fischer whose life and work have both inspired and exemplified integrative approaches to development Building upon and inspired by the comprehensive scope of Fischer's Dynamic Skill Theory this book examines what an integrated theory of psychological development might look like Bringing together the work of prominent integrative thinkers the volume begins with an examination of philosophical presuppositions of integrative approaches to development It then shows how Dynamic Skill Theory provides an example of an integrative model of development After examining the question of the nature of integrative developmental methodology the volume examines the nature of developmental change processes as well as pathways and processes in the development of psychological structures both within and between psychological domains The team of expert contributors cover a range of psychological domains including the macro and micro development of thought feeling motivation self intersubjectivity social relations personality and other integrative processes It ends with a set of prescriptions for the further elaboration of integrative developmental theory and a tribute to Kurt Fischer and his influence on developmental psychology This book will be essential reading for graduate students and researchers of developmental psychology and human development specifically developmental science
