McNaughton, 2018-02-06 This title was first published in 2002 The interest in becoming globally competitive through network strategies particularly networks between small and medium sized firms in local business communities is high among academic researchers economic development agencies and growth orientated firms Important contributions to our understanding of the strategic use of networks are coming from a number of disciplinary and theoretical perspectives This volume provides a unique opportunity to both synthesize this diverse literature and report the results of original research It is particularly relevant to scholars of business and management geography and economics Ethics in Small and Medium Sized Enterprises Laura Spence, Mollie Painter-Morland, 2010-10-01 This book is the first of its kind a global overview of extant research on ethics in small and medium sized enterprises While vast amounts of corporate money government policy and media time are directed at the social and ethical activities of large corporations small businesses don't generally attract the spotlight This is wildly inappropriate however since upward of 90% of private businesses are small or medium sized This book goes some way to helping us understand the social and ethical contribution of this majority organizational form The first section of the book is a global round up of research on ethics in small and medium sized enterprises from major regions of the world In the second section smaller scale research projects from a variety of countries present both empirical and theoretical advances in the area Anyone with an interest in ethics and small and medium sized enterprises should find this an inspiring book which paves the way for future research **Industrial and Labour Market Policy and Performance** Daniel Coffey, Carole Thornley, 2005-06-27 Industrial issues are often inextricably linked with labour market concerns and policy approaches that attempt to consider production and employment separately are inherently flawed This controversial statement sums up the heart of this important book With contributions from such scholars as Keith Cowling Malcolm Sawyer and Michael Kitson *Industrial and Labour Market Policy and Performance* covers such topics as the increasing inequality between rich and poor the links between innovation competition and collaboration education skills formation and human resource management The evidence led nature of the book will make it an important and useful read for students and academics involved in labour economics industrial economics and industrial policy The controversial findings of many of the chapters and its readable style will also appeal to informed policy commentators as well as policy makers themselves ECIE 2021 16th European Conference on Innovation and Entrepreneurship Vol 1 Dr Florinda Matos, Prof Maria de Fátima Ferreiro, Prof Álvaro Rosa, Prof Isabel Salavisa, 2021-09-16 These proceedings represent the work of contributors to the 16th European Conference on Innovation and Entrepreneurship ECIE 2021 hosted by ISCTE Business School Instituto Universitário de Lisboa Portugal on 16-17 September 2021 The Conference Chair is Dr Florinda Matos and the Programme Co Chairs are Prof Maria de Fátima Ferreiro Prof Álvaro Rosoi and Prof Isabel Salavisa all from
