Small fish for food security and nutrition Food and Agriculture Organization of the United Nations,2023-11-13 Food insecurity hunger and malnutrition have been on the rise in recent years due to disruptions such as the COVID 19 pandemic increasing climate shocks and conflicts Decades of steady progress to reduce food insecurity and malnutrition were often attributed to increased food production and intensification of few food staple crops and livestock however more recent focus has shifted to the role of small scale producers and the importance of diverse and nutritious foods This technical paper brings focus to the often overlooked small fish which play an integral role in the food security nutrition and livelihoods of the small scale fisherfolk who harvest process market trade and distribute small fish to communities near and far from water bodies The technical paper explores the various dimensions of the small fish food system addressing drivers scales interactions and multiple outcomes and trade offs such as that of small fish used for food versus feed Throughout the work applies a human centred perspective emphasizing how people are involved in various stages of a food system and how interactions and networks between them play a role in food system dynamics and outcomes It is also emphasizes how people play multiple roles within a food system and thus should not be narrowly defined as fishers processors or consumers The paper documents project implementation and lessons from the FAO subprogramme titled Implementing the Small Scale Fisheries Guidelines for gender equitable and climate resilient food systems and livelihoods and the SmallFishFood Ikan F3 Dried Fish Matters and Fish4Food projects led by the University of Bergen the University of Amsterdam and the University of Manitoba

Encyclopedia of Food Safety ,2013-12-12 With the world s growing

population the provision of a safe nutritious and wholesome food supply for all has become a major challenge To achieve this effective risk management based on sound science and unbiased information is required by all stakeholders including the food industry governments and consumers themselves In addition the globalization of the food supply requires the harmonization of policies and standards based on a common understanding of food safety among authorities in countries around the world With some 280 chapters the Encyclopedia of Food Safety provides unbiased and concise overviews which form in total a comprehensive coverage of a broad range of food safety topics which may be grouped under the following general categories History and basic sciences that support food safety Foodborne diseases including surveillance and investigation Foodborne hazards including microbiological and chemical agents Substances added to food both directly and indirectly Food technologies including the latest developments Food commodities including their potential hazards and controls Food safety management systems including their elements and the roles of stakeholders The Encyclopedia provides a platform for experts from the field of food safety and related fields such as nutrition food science and technology and environment to share and learn from state of the art expertise with the rest of the food safety community Assembled with the objective of facilitating the work of those working in the field of food safety and related fields such as nutrition food science and technology and environment this work covers the entire spectrum of food safety topics into one comprehensive reference work The Editors have made every effort to ensure that this work meets strict quality and pedagogical thresholds such as contributions by the foremost authorities in their fields unbiased and concise overviews on a multitude of food safety subjects references for further information and specialized and general definitions for food safety terminology In maintaining confidence in the safety of the food supply sound scientific information is key to effectively and efficiently assessing managing and communicating on food safety risks Yet professionals and other specialists working in this multidisciplinary field are finding it increasingly difficult to keep up with developments outside their immediate areas of expertise This single source of concise reliable and authoritative information on food safety has more than ever become a necessity

Assessment of Freshwater Fish Seed Resources for Sustainable Aquaculture Food and Agriculture Organization of the United Nations, 2007-01-01 Four of the most important resources to aquaculture outside human and technological resources are land water seed and feed Efficient use of these resources are necessary to guarantee optimum production from aquaculture A project Study and Analysis of Seed Production in Small scale Rural Aquaculture was implemented through a desk study and expert workshop held in Wuxi China from 23-26 March 2006 to assess the status of freshwater fish seed resources and supply and its contribution to sustainable aquatic production This publication is presented in two parts Part 1 contains the proceedings and major recommendations of the expert workshop which tackled three major themes a seed quality genetics technology and certification b seed networking distribution entrepreneurship and certification and c how rural fish farmers can benefit from the freshwater aquaculture seed sector Part 2 contains the detailed outcomes of the desk study

consisting of three regional syntheses Africa Asia and Latin America based on 21 country case studies five thematic reviews quality genetics and breeding seed networks and entrepreneurship seed supply in rural aquaculture farmer innovations and women involvement and three invited papers self recruiting species decentralized seed networking in Bangladesh and establishment of national broodstock centres in Viet Nam
