### **Financing Micro Health Insurance: Theory, Methods And**

**Evidence** David M Dror, 2018-12-27 Healthcare for all at affordable prices is still a major but universally elusive goal. Everyone spends money on healthcare and it is the most impoverishing consumption item. Thus most governments and the United Nations promote Universal Health Coverage each country's unique blend of tools for healthcare financing including taxes, subsidies, and market controls. Most people in low and middle income countries (LMICs) have no health insurance of any kind. And most LMIC governments lack the political will, information, or resources to require their citizens to buy health insurance themselves or to subsidize insurance for all who cannot afford the price. This book deals with financing voluntary and contributory health insurance for resource-poor and rural groups in LMICs. This book addresses three issues. The first is how to catalyze demand for health insurance and develop insurance literacy among the largely illiterate and innumerate target population using training programs to build an enabling consensus allowing locals to create and administer such schemes. The second involves the process of developing simplified methods for risk assessment which can help to underwrite risks, price the micro health insurance schemes, and ensure proper implementation. The third issue is formulating a compelling business case which would make this health insurance affordable, financially sustainable, and operationally scalable. This book develops insurance education and financial literacy for students of economics, business administration, insurance development studies, and social work to prepare them for practical work as implementers, policymakers, or evaluators. A supplementary section for teachers and students includes comprehension questions.

*Visual Displays in Qualitative and Mixed Method Research* Elizabeth G. Creamer, 2024-07-02 This boundary-spanning textbook explores diverse ways that visual display can advance understanding of complex social phenomena in applied fields in the social and human sciences. It provides a window into the latest advances in mixed methods research (MMR) by investigating how integrative tables and figures have been creatively adapted in diverse contemporary contexts where qualitative methods are prominent. The book affirms that the usefulness of visual displays is not restricted to reporting; it extends to helping investigators conceptualize a research problem, embed quality in research design, during planning, advance multi-dimensional sampling, to extend analysis, and as a tool to highlight integration during reporting. Chapters feature examples that demonstrate how different shapes and textual devices that are available through basic word processing software can help an investigator to think more complexly about the multi-dimensionality or temporality of a construct, process, or phenomenon. Tailored for emerging scholars, this comprehensive resource book will prove useful in seminars and workshops designed to assist students in writing a research proposal. It is an invaluable textbook for a new generation of hybrid research methods courses that combine qualitative and mixed methods in the social sciences, education, and healthcare.

**Mapping Equity and Quality in Mathematics Education** Bill Atweh, Mellony Graven, Walter Secada, Paola Valero, 2011-01-06 Concerns about quality mathematics education are often posed in terms of the types of mathematics that are worthwhile and valuable for both the

student and society in general and about how to best support students so that they can develop this mathematics Concerns about equity are about who is excluded from the opportunity to develop quality mathematics within our current practices and systems and about how to remove social barriers that systematically disadvantage those students This collection of chapters summarises our learning about the achievement of both equity and quality agendas in mathematics education and to move forward the debate on their importance for the field      **Encyclopedia of Communication Theory** Stephen W.

Littlejohn, Karen A. Foss, 2009-08-18 With more than 300 entries these two volumes provide a one stop source for a comprehensive overview of communication theory offering current descriptions of theories as well as the background issues and concepts that comprise these theories This is the first resource to summarize in one place the diversity of theory in the communication field Key Themes Applications and Contexts Critical Orientations Cultural Orientations Cybernetic and Systems Orientations Feminist Orientations Group and Organizational Concepts Information Media and Communication Technology International and Global Concepts Interpersonal Concepts Non Western Orientations Paradigms Traditions and Schools Philosophical Orientations Psycho Cognitive Orientations Rhetorical Orientations Semiotic Linguistic and Discursive Orientations Social Interactional Orientations Theory Metatheory Methodology and Inquiry      **Methods of Rhetorical Criticism** Bernard L.
