The Dog Linda P.

Case, 2013-03-25 Dogs are a part of nearly 40 percent of United States households. With this in mind, author Linda P. Case has written the definitive textbook on dogs and their care. Completely updated and revised, the second edition of *The Dog* covers four areas of compelling interest: the bond between dogs and humans, canine behavior, canine health and disease, and canine nutrition. Aiming to enhance the human-dog bond, author Case uses clear, understandable writing to explain selective breeding, training principles, solutions to common behavior problems, diet and nutrition, and preventative health care. Case liberally uses distinctive figures and tables, current references, plus suggested readings and a thorough glossary to aid in comprehension. More in depth than most dog books, *The Dog* will prove to be an indispensable tool for undergraduate companion animal courses, veterinary technician courses, and dog care training courses. In addition, it will serve as a valuable resource for professional breeders, trainers, exhibitors, and veterinary clinicians. *Workbook for McCurnin's Clinical Textbook for Veterinary Technicians* Joanna M. Girling, 2008-04-15 From budgies and cockatiels to chipmunks and chinchillas, our interest in exotic pets has rocketed in recent years. With the house rabbit being the UK's third most commonly kept pet after the cat and dog, and sales in small mammals, reptiles, and birds continuing to grow, exotic pets have now become a specialist area of veterinary practice in their own right. *Veterinary Nursing of Exotic Pets* is the first book to address the need for a definitive reference book devoted entirely to the principles and applications of nursing exotic species. Developed from a City and Guilds course, it not only covers husbandry, nutrition, and handling but also explores anatomy and chemical restraint and provides an overview of diseases and treatments. **Equine Clinical Nutrition** Rebecca L.
