context     *Restructuring Education* Simon Hakim, Daniel Ryan, Judith C. Stull, 2000-08-30 American education is undergoing rapid change. Concern over poor student performance, the ability and motivation of teachers, and the inefficiency of school bureaucracy have led to numerous recommendations for changing the structure of American education. These vary from small changes in the current structure to wholesale privatization of public schools. The contributions in this book discuss a wide range of proposals, including greater school choice, charter schools, promoting contact with the business community, public-private partnerships, and more. Several chapters assess the current research on choice and restructuring. Overall, the consensus is that proposed reforms have a good chance of yielding significant benefits.

*Privatization and Restructuring of Electricity Provision* Daniel Czamanski, 1999-04-30 Before the energy crisis of the 1970s, electricity provision was a non-issue worldwide, but the crisis of 1973 induced policymakers to consider private and restructured electricity provision as an alternative to unified publicly and privately owned systems. Czamanski examines arguments and experiences concerning the divestiture of state-owned enterprises in a variety of political and technological contexts. He also considers restructuring under the Thatcher government in Great Britain, the reforms drafted by Czamanski in Israel, and restructuring in the United States, as well as events in Norway, the Pacific Rim, Canada, and the developing countries. In addition, he considers the advantages and disadvantages of privatizing through theoretical discussion and by exploring experiences in various countries.

Prison Privatization Byron Eugene Price, John Charles Morris, 2012-09-20 This book examines the current state of both the theory and practice of prison privatization in the United States in the 21st century, providing a balanced compendium of research that allows readers to draw their own conclusions about this controversial subject. This three-volume set brings together noted scholars and experts in the field to provide a comprehensive treatment of the subject of privatized prisons in the United States. It is a definitive work on the topic that synthesizes current thought on both the theory and practice of prison privatization. Volume I provides a broad brush overview of private prisons, discussing the history of prison privatization and examining the expansion of the private prison industry and the growth of inmate populations in the United States. Volume II focuses on the corrections industry itself, providing essays that explore the business models, profit motivations, economic factors, and operations of the corporations that offer corrections services, while Volume III explores the political and social environment of prison privatization. Academics, practitioners, policy makers, and advocates for and against private prisons will find this work useful and enlightening, while general readers can use the unbiased information to draw their own conclusions in respect to the merits of prison privatization.
