Mondada, 2021-11-04 This book offers a novel perspective on how people engage in sensing the materiality of the world as a way of social interaction. Based on a uniquely rich set of video recorded data, the author shows how people reacting to cheese in gourmet shops across Europe highlights the part the senses play in human behaviour and communication. The multimodal analysis of the case studies reveals the systematic features of looking, touching, smelling and tasting in situated activities. By blending interdisciplinary research with real life, the volume puts together a theoretical and methodological framework for studying the embodied and linguistic dimensions of sensing in interaction.
