Aristotle's ›Parva naturalia‹ Ronald Polansky,2024-05-20 Aristotle's Parva naturalia continues the investigation begun in the De anima. The De anima defines the soul and treats its main powers: nutrition, sense, perception, intellection, and locomotion. The Parva naturalia: On sense and sensible objects; On memory and recollection; On sleep; On dreams; On divination in sleep; On motion of animals; De motu animalium; On length and shortness of life; and On youth and old age and respiration. It attends more to bodily involvement with soul. While each work offers fascinating and challenging insights, there has never been as extensive a commentary covering them together. A reason is that the works have often been viewed as incidental and even inconsistent. The De motu animalium has not typically been included when viewed as an isolated work on animal locomotion. This commentary argues that the treatises considered together and with the De motu among them display a tight sequence manifesting an artful yet easily overlooked design. We reveal many techniques of Aristotle's writing that have received little consideration previously. Our commentary contributes to a unified and comprehensive account of Aristotle's overall project regarding the soul and its connections with the body. **Scenting Salvation** Susan Ashbrook

Harvey,2015-08-25 This book explores the role of bodily sensory experience in early Christianity, first seventh centuries AD, by focusing on the importance of smell in ancient Mediterranean culture. Following its legalization in the fourth century, Roman Empire Christianity cultivated a dramatically flourishing devotional piety in which the bodily senses were utilized as crucial instruments of human-divine interaction. Rich olfactory practices developed as part of this shift, with lavish uses of incense, holy oils, and other sacred scents. At the same time, Christians showed profound interest in what smells could mean. How could the experience of smell be construed in revelatory terms? What specifically could it convey? How and what could be known through smell? Scenting Salvation argues that ancient Christians used olfactory experience for purposes of a distinctive religious epistemology, formulating knowledge of the divine in order to yield, in turn, a particular human identity. Using a wide array of Pagan, Jewish, and Christian sources, Susan Ashbrook Harvey examines the ancient understanding of smell through religious rituals, liturgical practices, mystagogical commentaries, literary imagery, homiletic conventions, scientific, medical, and cosmological models, ascetic disciplines, theological discourse, and eschatological expectations. In the process, she argues for a richer appreciation of ancient notions of embodiment and of the roles the body might serve in religion. **Sense of Smell** Fred Goodwin,2001-10 **A Copious Dictionary in Three Parts** Francis Gouldman,1664
