paid to how economic globalization and the acceptance of neoliberal governing ideology is shaping the health of Canadians. The COVID 19 epidemic vividly illustrated the importance of the social determinants of health as sickness and death rates were strikingly higher among Canadians in groups already experiencing adverse living and working conditions and poorer health: lower income Canadians, recent immigrants of colour, and those experiencing housing and food insecurity. If anything positive is to come out of this experience, it will be recognition that in the current post COVID 19 environment, it is essential to understand the socio-economic conditions that shape the health of individuals and communities.

Social Determinants of Health Fourth Edition is aimed at courses focusing on the social determinants of health at Canadian universities and colleges, particularly those in health studies and nursing, but also allied health, sociology, and human services. *Social Sciences Sociology Fourth Edition* by Mary K.
