Salim, 2015-02-26 This book explores the relationship between transnational and local Islam as expressed in public discourse and policy making as represented in the local press It does so against the background of local governments in majority Muslim regions across Indonesia promoting and passing regulations that mandate forms of social or economic behaviour seen to be compatible with Islam The book situates the political construction of Islamic behaviour in West Sumatra and in Indonesia more generally within an historical context in which rulers have in some way engaged with aspects of Islamic practice since the Islamic kingdom era The book shows that while formal local Islamic regulations of this kind constitute a new development their introduction has been a product of the same kinds of interactions between international national and local elements that have characterised the relationship between Islam and politics through the course of Indonesian history The book challenges the scholarly tendency to over emphasise local political concerns when explaining this phenomenon arguing that it is necessary to forefront the complex relationship between local politics and developments in the wider Islamic world To illustrate the relationship between transnational and local Islam the book uses detailed case studies of four domains of regulation Islamic finance zakat education and behaviour and dress in a number of local government areas within the province **Resources in Education** , 1987 **Sociology** , 1994 **Durkheim, the Durkheimians, and the Arts**
