

ECOLOGICAL PERSPECTIVE

The ecological perspective is a theoretical and practical approach to the social sciences that emphasizes the interactions between an individual and their environment.

DEFINITION

This perspective emphasizes that individuals develop within and are influenced by complex systems of social, cultural, and physical environments. According to Satchell et al. (2021), "...an ecological approach is about the understanding of individual's perceived behavioral opportunities and gives important focus on what the environment might offer an individual in a place" (p. 1).

EXAMPLE

The impact of 'nurture' in child development: A child's upbringing is greatly influenced by their immediate family and caretakers, which can include parenting style, availability of resources, and other family dynamics. Additionally, community resources and social support structures, as well as cultural values and traditions, significantly impact a person's development.

The Sociology of U.S. Agriculture Don E. Albrecht, Steve H. Murdock, 1990 **The Sociology of U. S. Agriculture** Don E. Albrecht, Steve H. Murdock, 1990 Handbook of the Sociology of Racial and Ethnic Relations Pinar Batur, Joe R. Feagin, 2018-06-11 The study of racial and ethnic relations has become one of the most written about aspects in sociology and sociological research In both North America and Europe many traditional cultures are feeling threatened by immigrants from Latin America Africa and Asia This handbook is a true international collaboration looking at racial and ethnic relations from an academic perspective It starts from the principle that sociology is at the hub of the human sciences concerned with racial and ethnic relations *Ecological-Evolutionary Theory* Gerhard Lenski, 2015-11-17 For forty years in a variety of books and articles Gerhard Lenski has become the most influential proponent of ecological and evolutionary explanations of human societies their development and transformations from the Stone Age to the present In his newest book Lenski offers a succinct but comprehensive statement of the full body of his theory followed by demonstration of how it can be used to generate new and valuable insights when applied to a set of highly diverse issues These include debates concerning the origin of ancient Israel and its distinctive culture the rise of the West in the modern era the highly varied trajectories of development of Third World nations in recent decades and the failure of Marxist efforts to transform society in the Soviet Union and elsewhere In the concluding chapter Lenski discusses a number of other issues and areas where ecological evolutionary theory may be fruitfully applied in the future *World Agricultural Economics and Rural Sociology Abstracts*, 1973 *Land Mosaics* Richard T. T. Forman, 1995-11-09 An analysis and synthesis of the ecology of heterogeneous land areas *Agriculture and Human Values*, 2003 Sociological Abstracts Leo P. Chall, 1997 Bioregional Planning and Design: Volume I David Fanfani, Alberto Matarán Ruiz, 2020-07-20 This book provides a review of the bioregionalist theory in the field of spatial planning and design as a suitable approach to cope with the growing concerns about the negative effects of metropolization processes and the need for a sustainable transition The book starts out with a section on rethinking places for community life and discusses the reframing of regional governance and development as well as social justice in spatial planning It introduces the concept of the urban bioregion a pivotal concept that underpins balanced polycentric spatial patterns and supports self reliant and fair local development The second part of the book focuses on planning and particularly on the issues that arise from the circular recovery of the relation between city and agro ecosystems for integrated planning and resilience of settlements and discusses topics such as foodshed planning biophilic urbanism and the integration of rural development and spatial planning This volume sets out the reference framework for Volume II which deals with more specific and operational issues related to spatial policies and settlement design **Routledge Handbook of Biosecurity and Invasive Species** Kezia Barker, Robert A. Francis, 2021-05-11 This handbook provides a comprehensive overview of the assessment and management of potentially dangerous infectious diseases quarantined pests invasive alien

species living modified organisms and biological weapons from a multitude of perspectives Issues of biosecurity have gained increasing attention over recent years but have often only been addressed from narrow disciplines and with a lack of integration of theoretical and practical approaches The Routledge Handbook of Biosecurity and Invasive Species brings together both the natural sciences and the social sciences for a fully rounded perspective on biosecurity shedding light on current national and international management frameworks with a mind to assessing possible future scenarios With chapters focussing on a variety of ecosystems including forests islands marine and coastal and agricultural land as well as from the industrial scale to individual gardens this handbook reviews the global state of invasions and vulnerabilities across a wide range of themes and critically analyses key threats and threatening activities such as trade travel land development and climate change Identifying invasive species and management techniques from a regional to international scale this book will be a key reference text for a wide range of students and academics in ecology agriculture geography human and animal health and interdisciplinary environmental and security studies

Sustainable Intensification of Agriculture

Jules Pretty, Zareen Pervez Bharucha, 2018-06-14 Sustainable intensification SI has emerged in recent years as a powerful new conceptualisation of agricultural sustainability and has been widely adopted in policy circles and debates It is defined as a process or system where yields are increased without adverse environmental impact and without the cultivation of more land Co written by Jules Pretty one of the pioneers of the concept and internationally known and respected authority on sustainable agriculture this book sets out current thinking and debates around sustainable agriculture and intensification It recognises that world population is increasing rapidly so that yields must increase on finite land and other resources to maintain food security It provides the first widely accessible overview of the concept of SI as an innovative approach to agriculture and as a key element in the transition to a green economy It presents evidence from around the world to show how various innovations are improving yields resilience and farm incomes particularly for resource constrained smallholders in developing countries but also in the developed world It shows how SI is a fundamental departure from previous models of agricultural intensification It also highlights the particular role and potential of small scale farmers and the fundamental importance of social and human capital in designing and spreading effective innovations *Bibliography of Agriculture*

, 1990 **Latin American Urbanization** Charles Butterworth, 1981-01-31 Originally published in 1981 as part of the Urbanization in Developing Countries series Latin American Urbanization presents an in depth look at a process of social change in an important region of the Third World In this study Professors Butterworth and Chance concentrate on the rural urban migration of the lower classes and the adaptation of migrants to city life They examine the rural peasant and proletarian communities from which the migrants have come and to which they often remain loyal even after many years of urban residence Drawing together in a coherent manner studies from several disciplines such as demographic sociocultural economic and political dimensions of urbanization this book will interest a variety of scholars in the social sciences and the

humanities Global Environmental Change Kirill Y. Kondratyev, Vladimir F. Krapivin, Gary W. Phillipe, 2013-06-29 The growing number of published works dedicated to global environmental change leads to the realization that protection of the natural environment has become an urgent problem The question of working out principles of co evolution of man and nature is being posed with ever increasing persistence Scientists in many countries are attempting to find ways of formulating laws governing human processes acting on the environment Numerous national and international programs regarding biosphere and climate studies contribute to the quest for means of resolving the conflict between human society and nature However attempts to find efficient methods of regulating human activity on a global scale encounter principal difficulties The major difficulty is the lack of an adequate knowledge base pertaining to climatic and biospheric processes as well as the largely incomplete state of the databases concerning global processes occurring in the atmosphere in the ocean and on land Another difficulty is the inability of modern science to formulate the requirements which must be met by the global databases necessary for reliable evaluation of the state of the environment and forecasting its development for sufficiently long time intervals **The Oxford Handbook of Personality and Social Psychology** Kay Deaux, Mark Snyder, 2018-10-30 The second edition of The Oxford Handbook of Personality and Social Psychology uniquely integrates personality and social psychology perspectives together in one volume Contributors explore historical conceptual methodological and empirical foundations that link the two fields together Further this new edition offers readers comprehensive coverage of new and emerging areas of theory research and application and assesses the fields growth and development since the publication of the first edition **Environmental Resources** A.S.
