**Amoral** Thomas Schramme,2014-08-22 Investigations of specific moral dysfunctions or deficits that shed light on the capacities required for moral agency Psychopathy has been the subject of investigations in both philosophy and psychiatry and yet the conceptual issues remain largely unresolved This volume approaches psychopathy by considering the question of what psychopaths lack The contributors investigate specific moral dysfunctions or deficits shedding light on the capacities people need to be moral by examining cases of real people who seem to lack those capacities The volume proceeds from the basic assumption that psychopathy is not characterized by a single deficit for example the lack of empathy as some philosophers have proposed but by a range of them Thus contributors address specific deficits that include impairments in rationality language fellow feeling volition evaluation and sympathy They also consider such issues in moral psychology as moral motivation moral emotions and moral character and they examine social aspects of psychopathic behavior including ascriptions of moral responsibility justification of moral blame and social and legal responses to people perceived to be dangerous As this volume demonstrates philosophers will be better equipped to determine what they mean by the moral point of view when they connect debates in moral philosophy to the psychiatric notion of psychopathy which provides some guidance on what humans need in order be able to feel the normative pull of morality And the empirical work done by psychiatrists and researchers in psychopathy can benefit from the conceptual clarifications offered by philosophy Contributors Gwen Adshead Piers Benn John Deigh Alan Felthous Kerrin Jacobs Heidi Maibom Eric Matthews Henning Sass Thomas Schramme Susie Scott David Shoemaker Walter Sinnott Armstrong Matthew Talbert **The Society of the Selfie**

Jeremiah Morelock,Felipe Ziotti Narita,2021-12-14 This book explores how the Internet is connected to the global crisis of liberal democracy Today self promotion is at the heart of many human relationships The selfie is not just a social media gesture people love to hate It is also a symbol of social reality in the age of the Internet Through social media people have new ways of rating and judging themselves and one another via metrics such as likes shares followers and friends There are new thirsts for authenticity outlets for verbal aggression and social problems Social media culture and neoliberalism dovetail

and amplify one another feeding social estrangement With neoliberalism psychosocial wounds are agitated and authoritarianism is provoked Yet this new sociality also inspires resistance and political mobilisation Illustrating ideas and trends with examples from news and popular culture the book outlines and applies theories from Debord Foucault Fromm Goffman and Giddens among others Topics covered include the global history of communication technologies personal branding echo chamber effects alienation and fear of abnormality Information technologies provide channels for public engagement where extreme ideas reach farther and faster than ever before and political differences are widened and inflamed They also provide new opportunities for protest and resistance *Food Fraud Prevention* John W.

wrongdoers show remorse and how they show remorse are matters that attract great interest both in law and in popular culture In capital trials in the United States it can be a question of life or death whether a jury believes that a wrongdoer showed remorse And in wrongdoings that capture the popular imagination public attention focuses not only on the act but on whether the perpetrator feels remorse for what they did But who decides when remorse should be shown or not shown and whether it is genuine or not genuine In contrast to previous academic studies on the subject the primary focus of this work is not on whether the wrongdoer meets these expectations over how and when remorse should be shown but on how the

community reacts when these expectations are met or not met Using examples drawn from Canada the United States and South Africa the author demonstrates that the showing of remorse is a site of negotiation and contention between groups who differ about when it is to be expressed and how it is to be expressed The book illustrates these points by looking at cases about which there was conflict over whether the wrongdoer should show remorse or whether the feelings that were shown were sincere Building on the earlier analysis the author shows that the process of deciding when and how remorse should be expressed contributes to the moral ordering of society as a whole This book will be of interest to those in the fields of sociology law law and society and criminology

Managerial Accountant's Compass Gary Oliver, 2018-10-09 This is the first detailed view of the managerial accountant's role and responsibilities in organization setting Its aim is to foster role development the opportunity to work at an advanced level of practice Accounting studies develop technical skills associated with topics and responding to defined scenarios but provide very little guidance on what to recognizing and approaching the broad problems or challenges under conditions of uncertainty It is a double first because it provides the managerial accountant's compass as a general purpose analytical framework for managerial accounting independent of any selected theory and method The metaphor of a compass creates a mental schema for its four points named 1 goals and principles 2 boundaries and constraints 3 methods and models and 4 collegial relationships Dynastic Chinese and some other Central Asian cultures view the center as a fifth principal direction giving a total of five points The center represents a high standard ethical conduct and self care or moral compass Managerial Accountant's Compass offers an integrated and systematic guide to approaching situations that are constantly changing It gives a protective starting pattern which produces new meanings and awareness of the ambiguity and uncertainty for each situation Ultimately the managerial accountant's compass can help you make more effective sense of yourself your expertise and your practice in the organization where you work which should open career opportunities

*Clerical Errors* Peter Murnane, 2022-08-04 The Catholic church is in serious decline This book claims that the corruption of the institution derives from various clerical errors especially clericalism which assumes that clergy are superior and deserve privileges Clericalism divides the church into two unequal classes betraying the gospel which teaches that all people are equal Clerical privilege makes the sexual abuse of children more likely and has led most bishops to conceal it Clerical Errors begins by examining the trials and acquittal of Cardinal Pell Was it the jury who made a grave error or was it the cardinal Other chapters look at worldwide sexual abuse of children by Catholic clergy and traumatic impacts on survivors What might have caused this tragedy The institutional nature of the church Defective Canon Law Misuse of the sacrament of Confession Compulsory celibacy Homosexuality The book's last hopeful chapter proposes a radical but simple model for restoring the Christian church
