Boyle,2015-06-02 If as Buddhism claims the potential for awakening exists in all human beings we should be able to map the phenomenon with the same science we apply to other forms of consciousness A student of cognitive social science and a Zen practitioner for more than forty years Richard P Boyle brings his sophisticated perspective to bear on the development of a theoretical model for both ordinary and awakened consciousness Boyle conducts probing interviews with eleven prominent Western Buddhist teachers Shinzen Young John Tarrant Ken McLeod Ajahn Amaro Martine Batchelor Shaila Catherine Gil Fronsdal Stephen Batchelor Pat Enkyo O Hara Bernie Glassman and Joseph Goldstein and one scientist James Austin who have experienced awakening From the paths they traveled to enlightenment and their descriptions of the experience he derives three fundamental properties of awakened consciousness He then constructs an overarching model that explains how Buddhist practices help free the mind from attachments to reality and the self and make possible the three properties of awakening Specifically these teachers describe how they worked to control attention and quiet the mind detach from ideas and habits and open themselves to compassion Boyle s account incorporates current

theories of consciousness sociological insights and research in neuroscience to advance the study of awakened consciousness and help an even greater number of people to realize it *A Digest of the Laws, Manners, and Institutions of the Ancient and Modern Nations* Thomas Dew,1881 **American Book Publishing Record** ,2003 **Rhetoric and Human Consciousness** Craig R. Smith,2017-04-12 For two decades students and instructors have relied on award winning author Craig Smith s detailed description and analysis of rhetorical theories and the historical contexts for major thinkers who advanced them He employs key themes from important philosophical schools in this well researched chronicle of rhetoric and human consciousness One is that rhetoric is a response to uncertainty The modern philosophers like the naturalists of ancient Greece and the Scholastics who preceded them tried to end uncertainty by combining the discoveries of science and psychology with rationalism Their aim was progress and a consensus among experts as to what truth is However where modernism proved ineffective rhetoric was revived to fill the breach Another significant theme is that different conceptions of human consciousness lead to different theories of rhetoric and for every major school of thought another school of thought forms in reaction Classic and contemporary examples demonstrate the usefulness of rhetorical theory especially its ability to inform and guide By providing probes for rhetorical criticism discussions also demonstrate that rhetorical criticism illustrates verifies and refines rhetorical theory Thus the synergistic relationship between theory and criticism in rhetoric is no different than in other arts Theory informs practice analysis of successful practice refines theory Smith s absorbing study has been expanded to include thorough treatments of rhetoric in the Romantic Era feminist and queer theory and historical context for the creation of rhetorical theory and its use in public address Кабинет доктора Либи́до. Boeri,Yasuhira Y. Kanayama,Jorge Mittelman,2018-06-06 This book offers new insights into the workings of the human soul and the philosophical conception of the mind in Ancient Greece It collects essays that deal with different but interconnected aspects of that unified picture of our mental life shared by all Ancient philosophers who thought of the soul as an immaterial substance The papers present theoretical discussions on moral and psychological issues ranging from Socrates to Aristotle and beyond in connection with modern psychology Coverage includes moral learning and the fruitfulness of punishment human motivation emotions as psychic phenomena and more Some of these topics directly stemmed from the Socratic dialectical experience and its tragic outcome whereas others found their way through a complex history of refinements disputes and internal critique The contributors present the gradual unfolding of these central themes through a close inspection of the relevant Ancient texts They deliver a wide ranging survey of some central and mutually related topics In the process readers will learn new approaches to Platonic and Aristotelian psychology and action theory This book will appeal to graduate students and researchers in Ancient philosophy Any scholar with a general interest in the history of ideas will also find it a valuable
