- It used to be low-level and device dependent packages supplied by the vendor, making it very difficult to port the software.
- We have now moved to high-level device independent packages, which allow much easier porting of software.
- Several standard device-independent graphics libraries are based on geometric modeling.

system would decrease software costs by helping to provide portability and interoperability between computer systems in today's multivendor environments. Users would be able to more easily purchase new equipment and technologies and cost effectively reuse their applications. And they could more easily connect heterogeneous equipment in different departments without having to constantly write and rewrite interfaces. On the other hand, many users in various organizations do not understand the ramifications of general purpose versus real time UNIX. Users tend to think of real time as a way to handle exotic heart monitoring or robotics systems. Then these users use UNIX for transaction processing and office applications and complain about its performance robustness and reliability. Unfortunately, the users don't realize that real time capabilities added to UNIX can provide better performance robustness and reliability for these non real time applications. Many other vendors and users do realize this, however. There are indications even now that general purpose UNIX will go away as a separate entity. It will be replaced by a real time UNIX. General purpose UNIX will exist only as a subset of real time UNIX.

The workshop is the second of a series, the first of which was held in the Spring of 1985. As you study these papers, recall that this workshop occurred during the time that many changes were occurring in Eastern Europe and world wide. The need to identify training technologies for maintaining a capable and ready force during times of decreases in military force structure was and is currently our challenge. The opportunities for these technologies to provide a service and opportunity for nonmilitary usage is our future. Therefore, this workshop maintained its focus on technology and application regardless of the user.
