## **Solar Crisis:**

Solar, Wind and Land Troy A. Rule, 2014-09-19 The global demand for clean renewable energy has rapidly expanded in recent years and will likely continue to escalate in the decades to come Wind and solar energy systems often require large quantities of land and airspace so their growing presence is generating a diverse array of new and challenging land use conflicts Wind turbines can create noise disrupt views or radar systems and threaten bird populations Solar energy projects can cause glare effects impact pristine wilderness areas and deplete water resources Developers must successfully navigate through these and myriad other land use conflicts to complete any renewable energy project Policymakers are increasingly confronted with disputes over these issues and are searching for rules to effectively govern them Tailoring innovative policies to address the unique conflicts that arise in the context of renewable energy development is crucial to ensuring that the law facilitates rather than impedes the continued growth of this important industry This book describes and analyses the property and land use policy questions that most commonly arise in renewable energy development Although it focuses primarily on issues that have arisen within the United States the book's discussions of international policy differences and critiques of existing approaches make it a valuable resource for anyone exploring these issues in a professional setting anywhere in the world

**Low-tech Magazine 2012-2018** Kris De Decker, 2019-03-18 Low tech Magazine underscores the potential of past and often forgotten technologies and how they can inform sustainable energy practices Sometimes past technologies can be copied without any changes More often interesting possibilities arise when older technology is combined with new knowledge and new materials or when past concepts and traditional knowledge are applied to modern technology Inspiration is also to be found in the so called developing world where resource constraints often lead to inventive low tech solutions

**Japanese Science Fiction, Fantasy and Horror Films** Stuart Galbraith IV, 2025-03-05 This is a detailed analysis of 103 Japanese science fiction horror and fantasy feature films released theatrically or directly to television in the United States from 1950 through 1992 Each entry provides a plot synopsis critique background on the production contemporary review quotes and a comparison between the U S and Japanese versions The filmography is arranged by studio and includes American and Japanese titles release dates and releasing studios comprehensive production and cast credits running time U S rating when appropriate and alternate titles

A Guide to Apocalyptic Cinema Charles P. Mitchell, 2001-02-28 This examination and comprehensive assessment of apocalyptic film studies fifty films that illustrate the variety range and different categories of the genre Apocalyptic films are those that depict on screen as part of the story an event threatening the extinction of mankind A brief overview identifies seven major categories of apocalyptic films the religious or supernatural celestial collision solar or orbital disruption nuclear war and radioactive fallout germ warfare or pestilence alien device or invasion and scientific miscalculation Alphabetically arranged entries rate the films and provide production information an annotated cast listing a synopsis of the film a critique and representative quotes Film scholars and

those with a special interest in apocalyptic cinema will appreciate the overview and detailed analysis of the films Appendices provide additional examples of apocalyptic movies excluded from the main text a sampling of post apocalyptic cinema which is distinct from the apocalyptic genre and examples of apocalyptic television Illustrations are included

**Lab Coats in Hollywood** David A. Kirby, 2013-02-08 How science consultants make movie science plausible in films ranging from 2001 A Space Odyssey to Finding Nemo Stanley Kubrick's 2001 A Space Odyssey released in 1968 is perhaps the most scientifically accurate film ever produced The film presented such a plausible realistic vision of space flight that many moon hoax proponents believe that Kubrick staged the 1969 moon landing using the same studios and techniques Kubrick's scientific verisimilitude in 2001 came courtesy of his

science consultants including two former NASA scientists and the more than sixty five companies research organizations and government agencies that offered technical advice Although most filmmakers don t consult experts as extensively as Kubrick did films ranging from A Beautiful Mind and Contact to Finding Nemo and The Hulk have achieved some degree of scientific credibility because of science consultants In Lab Coats in Hollywood David Kirby examines the interaction of science and cinema how science consultants make movie science plausible how filmmakers negotiate scientific accuracy within production constraints and how movies affect popular perceptions of science Drawing on interviews and archival material Kirby examines such science consulting tasks as fact checking and shaping visual iconography Kirby finds that cinema can influence science as well Depictions of science in popular films can promote research agendas stimulate technological development and even stir citizens into political action

**Directed by Allen Smithee** Jeremy Braddock, Stephen Hock, 2001 Allen Smithee specializes in the mediocre He is versatile He is prolific And he doesn t exist From 1969 until 1999 Allen Smithee was the pseudonym adopted by Hollywood directors when they wished not to be associated with films ostensibly of their making Encompassing over fifty films of various stripes B movies sequels music videos made for TV movies Smithee s three decades of work affords the authors of this volume a unique opportunity to reassess the claims of auteurism both in its traditional guise and in the more commodified form it currently assumes Sometimes treating Smithee as an auteur in much the same way critics and scholars have treated directors as diverse as Douglas Sirk Abbas Kiarostami and Quentin Tarantino the contributors reclaim new possibilities for auteurist filmmaking and film studies even as they show what an empty display it has recently become In accounting for this change the essays in this volume employ innovative theories of authorship to recapture the subversive effect that auteurism once enjoyed Thus the Smithee name becomes part of a larger discussion of the economics and history of pseudonyms in filmmaking notably in the blacklist of the 1950s as well as an opportunity to employ Jacques Derrida s theory of the signature to recover obscured economic and historic contexts within Smithee s films Unique in its focus innovative in its approach Directed by Allen Smithee argues that it is precisely through throwaway films such as Smithee s that recent Hollywood cinema can best be studied
