There is a saying that solar energy might be the last gold rush energy resource for people in the digital age to exploit Energy produced by sunlight isn't owned by any government Energy produced by sunlight isn't taxed as a commodity by anyone The era of renewable energy is dawning and every homeowner who is regularly taken aback by their home energy bills for electricity should take notice No strike that thought must take notice of the potential long term benefits of home solar energy conversion As a homeowner I was skeptical about changing the way I powered my home I was used to paying for electricity like any other homeowner The idea of converting my home to photovoltaic or PV system seemed too fringe or fad friendly A bit too new age for my taste I think as human beings it is hard to let go of the usual way of doing things I realized and accepted that the usual way of doing things in the public and private energy sector was coming to an end My research into home solar energy conversion began in earnest when I accepted the fact that the renewable energy industry will only continue to grow Now is the best time in decades to affordably buy a residential solar energy setup Converting your home energy setup to solar energy is expensive there is no question about it Still there are many readily available solar energy friendly government tax incentives available I saved 30 percent on my initial home solar energy conversion purchase costs The 5 000 kilowatt solar panel array installed on my roof cost me about 17 000 My home is about 2 500 square feet which is the national average How much you will actually pay for your home solar energy conversion will vary state to state and how much sun exposure your region experiences So think of it this way when you take out a mortgage on your home that is a long term investment as well Initial home solar energy conversion costs are comparable to the purchase of a brand new economy grade vehicle My home solar energy setup will pay for itself in a few years Most importantly after I sought out every solar friendly tax incentive that applied to me my initial purchase price of 17 000 was knocked down to 11 000 I am still hooked up to the utility grid but I only draw power from it at night or incidents of inclement weather That is unless I have enough energy stored in my reserve battery Moreover through a process called net metering any excess electricity that I generate is sold to the utility company Yes that's right the power company pays me However this is via non monetary credit as opposed to the popular fiction that utility companies pay for excess electricity generated by residential solar energy systems Still free energy is free energy right As a homeowner if you are on the fence whether you should go with solar or not here is what may

help you cross that fence The 30% federal tax incentives will go away in just 3 more years Price of technology goes down over the years and Solar panels have been around for a long time so the prices are as low as they would go You are helping the environment and living Green You are saving money Just think where else can you invest 11 000 and get back 175 a month I have gone through the exact debate and done my research for over a year In this book I answer all the questions a homeowner would ask I also discussed how you can DIY your project vs having it done by a contractor [Complete Guide to Roofing and Solar](#) Jon Nelsen, 2022-07-13 Are you worried about overpaying for a new roof or solar panel system What if you could turn your biggest homeowner expense into monthly income without spending a dime Stop Paying Electricity Bill Turn Your Home into A Monthly Income Machine Get the Roof of Your Dreams Without Breaking the Bank Is it possible How Learn how to turbocharge your home's value and your monthly cash flow using government funded solar energy on your roof In this boxed set homeowner manual from Jon Nelsen Complete Guide to Roofing and Solar you will learn how to save 30% of your solar costs on your income taxes why there will never be a better time to go solar the trick to lock in your energy price for life what it takes to sell your home faster AND for more money in any market how to do it all with no money out of pocket the best roofing for your home most energy efficient roofing materials how to save money on homeowners insurance what you NEED to ask a potential roofing contractor before the job begins why gutter maintenance is essential to the preservation of your home how to save thousands on your next roofing project and much more Like most people you probably think that solar energy is expensive and difficult to install The truth is that solar panels can be yours for no money down and are easier than ever to set up Complete Guide to Roofing and Solar is a comprehensive resource that reveals the facts about solar energy and makes it easy for you to learn how you can use solar to slash your electric bill live better and save the planet Solar Energy For Your Home stop renting your energy today scroll up and GET IT NOW Solar consultant and self proclaimed solar junkie Jon Nelsen offers a simple explanation why rooftop solar is your best option in this tell all book He refutes common misconceptions dismantles popular myths and explains how solar can help you live better from growing your wallet to cleaning the very air you breathe If you've been putting off that new roof or refusing to consider solar energy because you've heard it's expensive doesn't provide enough power or because the technology just isn't there yet then you NEED to read this boxed set Complete Guide to Roofing and Solar may just save thousands in unnecessary utility bills and expensive roofing jobs over the next 3 4 decades Traditional energy monopolies have bought our governments The truth about the health and environmental consequences of coal oil and gas are being kept secret from us Your reality is skewed by the myth we've been told about fossil fuels But don't worry The solution is here it's affordable and the shift to solar power is unstoppable and easier than ever Complete Guide to Roofing and Solar can help you unlock the potential to live a healthier more sustainable life that supercharges your net worth and cuts your monthly utility bill HOMEOWNERS BEFORE YOU AGREE TO ANY SOLAR INSTALLATION OR ROOF REPAIR YOU NEED TO READ THIS BOOK change your life lower your bills save money
