Sopwith Aircraft, 1912-1920 Horace Frederick King,1981 **Britain's Glorious Aircraft Industry** J Paul Hodgson,2021-03-03 The rich and diverse history of the British aircraft industry is captured in superb detail by the author in this weighty tome Aviation News Great Britain s aircraft industry started in 1908 with the first formally registered organization in the world to offer to design and build an aeroplane for commercial gain This book tells the complete story of the 110 years since the start all the companies formed and the aircraft they produced highlighting the advances in aeronautical ambition and technology It is the story of the creation survival and decline of all one hundred and twenty three of the aircraft design and construction companies formed between 1908 and 2018 The exhilaration of success and the magic of aviation technology are vividly illustrated by the technical and political birth stories of iconic projects such as the Cirrus Gypsy Moths the Tiger Moth the flying boats of Imperial Airways Spitfire Lancaster Viscount Vulcan Harrier Buccaneer and many more The rotary wing industry is not forgotten The birth of the jet turbine engine and the quest for supersonic speed is included The stories of the disappointments of failure and disaster such as the Brabazon Comet Princess Rotodyne and TSR 2 and the growth of international collaboration in Concorde Tornado Airbus Eurofighter Typhoon and other projects are included in the context of the international scene and domestic politics The conclusion highlights the prominent reminiscences and speculates on the future of the aircraft industry in Britain An outstanding reference book and a thoroughly enjoyable canter through the decades from the days of wood and fabric to the modern composite structure of the wings of the A400 Atlas RAF Historical Society International Warbirds John C. Fredriksen,2001-08-01 In depth descriptions and photographs of the aircraft of 21 nations presented with a unique human dimension that goes behind the machines to the people involved Invaluable for specialists accessible to enthusiasts International Warbirds An Illustrated Guide to World Military Aircraft 1914 2000 puts the most legendary fighter aircraft of the 20th century developed outside the United States on vivid display It offers 336 illustrated biographies of the most significant warplanes used in squadron service from World War I to the Balkan conflict including numerous models from Great Britain France Russia and Japan as well as notable machines from Israel Canada China India Brazil and other nations Entries span the history and scope of military aircraft from bombers and fighters to transports trainers reconnaissance craft sea planes and helicopters with each capsule history combining nuts and bolts technical data with the story of that model s evolution and use Together these portraits offer an exciting well researched tribute to visionary designers and builders as well as courageous pilots and crews across the globe and tell a vivid tale of how air power became such a decisive factor in modern warfare **Aircraft ,1912 Military Aircraft of Australia, 1909-1918** Keith Isaacs,1971 Beskriver milit rflyvningen i Australien herunder flytyper og organisation samt den historiske udvikling for Australien s flyvev ben Fall of the Red Baron Leon Bennett,2012-02-19 Fighter pilot Manfred von Richthofen the Red Baron lacked innate aerobatic ability As a tyro he attempted to solve this

problem through denial going so far as to sneer at stunting as pointless Great War air combat experience proved quite the reverse and so we would anticipate a short and sad fighting life for the fellow Yet the Red Baron became the Great War's single greatest scorer as measured by total victories How did he do it This book is concerned with tactics especially those tactics used by the Red Baron and his opponents It offers the how and why of Great War aerial combat The author leans heavily on his expertise in engineering and aerodynamic techniques to explain this with his reasoning presented in a readable non mathematical style Absent are both the usual propaganda laced Air Service reports and psychobabble Offered instead is the logic behind Great War aerial combat i e those elements determining success or failure in the Red Baron's air war Gunnery experience led to the machine gun as the weapon best suited for aerial combat Joined with a suitable aircraft the extremely successful Fokker diving attack resulted In reaction effective defensive techniques arose using forms of shrewd tactical cooperation by two seater crews pilot and gunner These are detailed Numbers mattered establishing the level of assault firepower Tactics of machines flying together in formation are given as well as those of formation busters intent upon reversing the odds and turning large numbers into a disadvantage A pilot's nature and emotions had much to do with choosing between the options defining tactics What were the aces like How were tactics tailored to suit personality What traits made for the ability to grapple with a jammed machine gun A dozen high achievers are examined in terms of tactics and background In a fascinating study Leon Bennett covers all of these aspects of WWI aerial combat and more Similarly the author turns his attention to examining the cause of von Richthofen's death employing the tools of logic rather than merely accepting one of the many conflicting eyewitness reports as truth In doing so much testimony is exposed as unlikely The bullet scatter to be expected from ground anti aircraft fire matters greatly and is developed along with the odds against lone riflemen hoping to hit a fast moving low altitude target The most dangerous altitude for front line crossing is established The author concludes by rating the possibility of a rifleman downing the Red Baron as quite realistic certainly as likely as any of the more celebrated possibilities This is an important book offering a groundbreaking account of WWI aerial tactics and a thorough examination of the final combat and death of the Red Baron
