while policy debates rage over how best to disarm refugees and prevent them from destabilizing neighbouring states there is surprisingly little evidence explaining why displaced people arm themselves or precisely how militarization affects hosting communities No Refuge analyses the experience of refugee and IDP militarization in several African countries affected by and emerging from civil war including Guinea Rwanda Uganda and Tanzania It provides a considered overview of the historical political and regional dimensions of refugee and IDP militarization in Africa as well as international and national efforts to contain it

Weaponomics: the global market for assault rifles Phillip Killicoat, 2007 Abstract This paper introduces the first effort to quantitatively document the small arms market by collating field reports and journalist accounts to produce a cross country time series price index of Kalashnikov assault rifles A model of the small arms market is developed and empirically estimated to identify the key determinants of assault rifle prices Variables which proxy the effective height of trade barriers for illicit trade are consistently significant in determining weapon price variation When controlling for other factors the collapse of the Soviet Union does not have as large an impact on weapon prices as is generally believed
