Educating for Humanity Mike Seymour, Henry M.

Levin,2015-11-17 At a time of profound crises around the world when social justice peace democracy and the environment seem under increasing threat the promise of a world for all seems a viable aspiration for education Ample evidence from many schools today and dating back throughout the last century prove that the purpose of educating young people to develop character compassion purpose and commitment is integral with the mastery of intellectual skills and life competencies Schooling without a doubt can play a monumental part in the development of the personal values people take with them to the world Unfortunately as the saying goes if you don t know where you re going you ll probably get someplace else Educational policy directions over the last twenty years have veered far away from the important work of educating for humanity This book makes a powerful appeal to revisit educational purpose in light of what is most fundamental and important to human beings everywhere The authors address timely issues such as high stakes testing school choice and privatization of education in looking beyond these measures to new approaches to educational excellence

The Politics of

Attracting Investment Chase C. Englund,2024-12-27 This book provides a tour through a novel theoretical approach to understanding the political economy of authoritarianism and the international market for capital investment As the author demonstrates through an extensive series of analysis success in attracting investment and ultimately fostering growth lies with the ability of the state to reduce investors uncertainty The author explores the market for FDI in nondemocratic states and finds that those states which feature reduced competition over policy between economic elites are more likely to attract investment inflows However these inflows are the result of incentives provided as private benefits for incumbent elites and tend to result in concentrated inflows In Part II this is contrasted with the way democratic states attract investment through institutional protections and public benefits In this way the author uncovers that authoritarian and democratic states achieve investor confidence through alternate paths to predictability one based on eliminating opposition through political consolidation and the other based on impartial rules and legal protections designed to constrain the excesses of political competition The theory s central premise that the concentration of economic influence with fewer economic elites is corrosive to political competition and institutional quality carries huge significance for the study of both authoritarian and democratic governance quality
