*Upgrading Tanzania's artisanal and small-scale mining through investor partnerships* Schoneveld, G.C., Chacha, M., Njau, M., Weng, X., Jonsson, J., 2017-12-19 Key messages: Foreign investors are increasingly partnering with ASM operators to access mineral rights and reserves in a high-risk and high-cost environment. This has led to an upgrading of ASM operations and indirect technology diffusion across mining areas through demonstration effects, but this upgrading may disrupt existing benefit-sharing arrangements between ASM laborers and pit owners/license holders. Upgrading of ASM through capital infusion and technology advancement is also accompanied by high environmental and occupational health and safety risks. The constrained capacity of sub-national institutions and lack of cross-institutional coordination are hampering governmental efforts to monitor and improve environmental and occupational health and safety practices of partnerships. Policy discussion is needed on the ASM investor partnership model's benefits and risks and how best to harness its potential to upgrade the sector as well as support the sustainable development of rural mining communities. Effective institutional coordination among key government institutions, particularly at the sub-national level, is urgently needed to reduce the high environmental and labor safety risks posed by mechanized small-scale mines.

**Mountain Movers** Daniel M. Franks, 2015-09-16 The products of mining are everywhere; if it wasn't grown, it was mined or drilled. But the mining industry has a chequered past. Pollution, human rights abuses and corruption have tarnished the reputation of the industry across the globe. Over a decade ago, the major mining companies embraced the concept of sustainable and equitable development and embarked on an explicit process of reform, but has the industry actually changed? This book explores the dynamics of change-making for sustainable development in the resources sector, specifically the mining of mineral and energy resources. The author recounts the stories and insights of over forty change-makers, both inside and outside the industry, from anti-mining activists to the professionals charged with the task of reform, introducing the

people who are moving an industry that moves mountains The book takes stock of what has worked and what has not analyzing the relative influence and dynamics of the key corporate civil society and government actors with a view to developing new approaches for improving environmental and social outcomes from mineral and energy development Illustrated with case studies from Angola Australia Brazil Canada Chile Colombia El Salvador Guinea Peru The Philippines Romania Sierra Leone South Africa and The United States of America and brimming with the backstories to the major sustainability initiatives Mountain Movers reveals where progress has been made and where reform is still needed towards a more sustainable and equitable mining industry      New Approaches to SME and Entrepreneurship Financing Broadening the Range of Instruments OECD,2015-10-28 This report maps a broad range of external financing techniques to address diverse needs in varying circumstances including asset based finance alternative debt hybrid instruments and equity instruments      *Lackawanna County Proposed New Business Park, Development and Operation, Lackawanna County* ,1999
