**Politics of the 'Other' in India and China** Lion Koenig, Bidisha Chaudhuri, 2016-02-22. The social sciences have been heavily influenced by modernization theory, focusing on issues of economic growth, political development and social change in order to develop a predictive model of linear progress for developing countries following a Western prototype. Under this hegemonic paradigm of development, the world tends to get divided into simplistic binary oppositions between the West and the rest, us and them, and self and other. Proposing to shift the discussion on what constitutes the Other as opposed to the Self, from philosophy and cultural studies to the social sciences, this book explores how the structural asymmetries existing between Western discourses and the realities of the non-Western world manifest themselves in the ideas, institutions and socio-political practices of India and China, and in how far they shape the social scientist's understanding of their discipline in general. It provides a counter-narrative by revealing the relativity of geographies and by showing that the conventional presentation of core elements of the Asian socio-political set-up as aberrations from the Western models fails to acknowledge their inherent strategic character of adapting Western concepts to meet local requirements. Drawing on multiple disciplines, concepts and contexts in India and China, the book makes a valuable contribution to the theory and practice of politics as well.

as to International and Asian Studies      Soft Power and the Worldwide Promotion of Chinese Language Learning Jeffrey Gil, 2017-05-11 The Confucius Institute Project consisting of Confucius Institutes and Classrooms the posting of Chinese language teachers to overseas schools and universities and the Chinese Bridge language competition represents an attempt by China to extend its influence globally through the use of soft power Facilitated by a rapidly increasing demand for Chinese language learning it has established a presence across the globe and made valuable contributions to the learning and teaching of Chinese However this has not necessarily led to an increasingly positive view of China either at a political or a societal level Through an analysis of official documents interviews with those involved a survey of Chinese language learners and a study of academic and media sources the author evaluates the aims of the project and discusses whether these aims are being met      Soft Skills Mihnea Moldoveanu, 2024-04-22 Although communicative and relational skills are currently in the greatest demand in organizations large and small we are as educators executives and talent developers very far away from the kind of precision in identifying measuring selecting and developing these skills that we have achieved with cognitive and technical skills At the same time the relentless automation of swaths of human tasks has placed a sharp light on the quintessentially human skills those that cannot and in some cases should not be subject to algorithmic automation This book aims to change the soft skills game by introducing language for identifying and describing them ways of measuring the degree to which a person possesses them and selecting those who possess them in the utmost from those less skilled and ways of helping students and executives alike develop them through a methodology that has been designed and practiced for the past ten years We need a re set in the way we think about human skill and in particular the ways we think about those human skills which cannot be sub contracted to an algorithm running on silicon This book aims to provide that re set

**Soft Power** Mingjiang Li, 2009-08-15 Soft power has become a very popular concept in international affairs, appearing in government policy papers, academic discussions, and the popular media. In China, soft power has become one of the most frequently used phrases among political leaders, leading academics, and journalists. Defined against hard power, which often involves threat and coercion, soft power applies attraction, persuasion, and cooperation, finding its sources in culture, political values, and foreign policies. China, rich in culture and traditional philosophy, boasts abundant sources of soft power. Soft Power attempts to analyze the domestic and international views of China's soft power, the main strengths and weaknesses of China's soft power, and the application of soft power in China's international politics. It provides a comprehensive exploration of the soft power dimension in China's foreign relations by integrating views from various disciplines such as history, education, culture, political economy, comparative politics, and philosophy. The book argues that soft power has become a very popular concept in China, that China is contemplating and exploring an innovative strategy in its rise and international politics, and that there have been quite a few notable elements of this in China's diplomatic practice, including softer rhetoric, promotion of the Chinese culture abroad, economic diplomacy, and image building. The book also argues that the limitations of China's soft power primarily stem from political values and China's own transitions, and reflects the reality that views and opinions regarding China's soft power are fairly diverse, both in China and in the international arena. Soft power is a useful and important perspective by which to understand Chinese foreign policy and the future evolution of China's role in international politics. This study is a pioneering work providing a new perspective for the study of Chinese foreign policy and the rise of China, that will appeal to scholars of Chinese foreign policy.

Much like Gardner's Multiple Intelligences Maulding Green and Leonard have in Leadership Intelligence The Journey to Your True North postulated a theory regarding the age old question are leaders born or are leaders made This theory is predicated on the idea that there is a genetic predisposition toward leadership via the vehicle of imprinting The five critical factors which undergird the tenets of Leadership Intelligence are delineated and developed through the lens of the soft skills of a leader There is further clarification as to why some leaders seem to have a greater intensity of these factors than their peers To aid the reader in relating to the theory a conceptual model based on a GPS is threaded throughout each chapter interweaving both examples and understandable content The model relates keeping the organization moving in a true north fashion The final chapters reveal how a leader can develop or enhance these skills and how he she can avoid leadership derailment due to neglecting them      Soft Skills Mastery: Unleash Your Hidden Power for Workplace Success Dr. Pooja Yadav, 2025-05-13      **Forbes** Bertie Charles Forbes, 1924 This business magazine covers domestic and international business topics Special issues include Annual Report on American Industry Forbes 500 Stock Bargains and Special Report on Multinationals      Soft Power With Chinese Characteristics Ying Zhu, Kingsley Edney, Stanley Rosen, 2019-12-05 This book examines the Chinese Communist Party's attempts to improve China's image around the world thereby increasing its soft power This soft attractive form of power is crucial if China is to avoid provoking an international backlash against its growing military and economic might The volume focuses on the period since Xi Jinping came to power in 2012 and is global in scope examining the impact of Chinese policies from Hong Kong and Taiwan to Africa and South America The book explains debates over soft power within China and delves into case studies of important policy areas for China's global image campaign such as film news media and the Confucius Institutes The most comprehensive work of its kind the volume presents a picture of a Chinese leadership that has access to vast material resources and growing global influence but often struggles to convert these resources into genuine international affection With a foreword by Joseph Nye Soft Power With Chinese Characteristics will be invaluable to students and scholars of Chinese politics and Chinese media as well as international relations and world politics more generally
