Neutrosophic Sets and Systems, Vol. 84, 2025 Florentin Smarandache, Mohamed Abdel-Basset, Maikel Leyva Vazquez, This special issue of Neutrosophic Sets and Systems a compilation of a workshop held at the Universidad Tecnológica de El Salvador explores the application of neutrosophic frameworks in a dialogue with Latin American worldviews to address contemporary challenges The volume challenges traditional Western logic which often fails to capture the complexity and ambiguity of real world contexts particularly in Latin America It highlights how neutrosophy's embrace of indeterminacy and contradiction can provide a more flexible and contextualized understanding The papers presented bridge neutrosophic concepts with indigenous knowledge systems such as Amerindian perspectivism which already transcend classical dualisms The research covers diverse topics including the use of neutrosophy in medical decision making trend identification in scientific articles via natural language processing and the evaluation of sustainable projects that integrate ancestral knowledge into the circular economy The issue demonstrates the contributions of Latin American thinkers to non classical logic and showcases neutrosophy's potential to provide philosophical and practical solutions to social problems **Boys'**
