**The Soils of Nepal** Roshan Babu Ojha, Dinesh Panday, 2021-10-14. This book publishes consolidated information on the soils of Nepal from all possible sources. The Survey Department, Government of Nepal, conducted two national scale soil survey projects to classify soils of Nepal: Land Resource Mapping Project ended in 1985 and National Land Use Planning Project ended in 2021. Both projects adopted the United States Department of Agriculture system of soil classification. Besides National Soil Science Research Center, previously known as Soil Science Division of Nepal Agricultural Research Council and Soil Management Directorate, Department of Agriculture also worked on soils of Nepal. To date, the information on the soils of Nepal is not published in well-documented form but has been reported widely as gray literature: project report, government report, or peer review articles. *The Soils of Nepal* is a part of World Soils Book Series which constitutes twelve chapters covering broad aspects such as soil research history, climate, geology, soil classification and mapping, and soil fertility. Furthermore, information about soil properties and relation between soil constituents of the dominant soil types of Nepal and their scope of use in the context of land use are described. This book also tries to simplify the intricate relationship among soil, culture, and people. Each chapter contains a comprehensive, richly illustrated, and up-to-date overview of the soils of Nepal. We believe it fulfils a quest for a global audience including students, educators, extension workers, and soil scientists who are interested to know the young soils of Nepal.

**The Soils of Ireland** Rachel Creamer, Lilian O'Sullivan, 2018-03-29. This book provides a comprehensive overview of pedology in Ireland. It describes the main soil types of the country, their functions, ecological use, and the conditions to which they were subjected, associated with management over time. In addition, it presents a complete set of data, pictures, and maps, including benchmark profiles. Factors involved in soil formation are also discussed, making use of new unpublished data and elaborations. The book was produced with the support and sponsorship of Teagasc, The Agriculture and Food Development Authority, Ireland, and the Irish
