Purushothama Raj, 2013 Soil Mechanics and Foundation Engineering 2e Presents the principles of soil mechanics and foundation engineering in a simplified yet logical manner that assumes no prior knowledge of the subject It includes all the relevant content required for a sound background in the subject reinforcing theoretical aspects with comprehensive practical applications Soil Mechanics and Foundations B. C. Punmia, Ashok Kumar Jain, 2005 **Introductory Soil Mechanics and Foundations** George F. Sowers, 1979 **Soil Mechanics and Foundations** James V. Parcher, Raymond Ellsworth Means, 1974 **Journal** American Society of Civil Engineers. Soil Mechanics and Foundations Division, 1961 **An Introduction to Soil Mechanics and Foundations** C. R. Scott, 2013-12-14 This book is mainly intended to meet the needs of undergraduate students of Civil Engineering In preparing the first edition of this book I had two principal aims firstly to provide the student with a description of soil behavior and of the effects of the clay minerals and the soil water on such behavior which was rather more detailed than is usual in an elementary text and secondly to encourage him to look critically at the traditional methods of analysis and design The latter point is important since all such methods require certain simplifying assumptions without which no solution is generally possible Serious errors in design are seldom the result of failure to understand the methods as such They more usually arise from a failure to study and understand the geology of the site or from attempts to apply analytical methods to problems for which the implicit assumptions make them unsuitable In the design of foundations and earth structures more than in most branches of engineering the engineer must be continually exercising his judgment in making decisions The analytical methods cannot relieve him of this responsibility but properly used they should ensure that his judgment is based on sound knowledge and not on blind intuition I hope that the book will prove to be of use to students when their courses are over and
