Three Test Cases from Minoan Crete

Soil Science And Archaeology

Richard I. Macphail, Paul Goldberg

Soil Science And Archaeology:

Soil Science and Archaeology INSTAP Academic Press, 2002-12-31 In this book Michael Morris presents a detailed study of the prehistoric landscape in three regions of Crete. He examines the development, stability and physio-chemical composition of selected soils near three archaeological sites: Karphi a Late Minoan IIIC refuge site, Chrysokamino a Final Neolithic to Late Minoan IIIB farmhouse, Vronta and Kastro near Kavousi two Late Minoan IIIC to Geometric sites. Morris offers conclusions on the history of the Cretan landscape and its formation processes and how those processes contribute to our understanding of the human use of the landscape. The book will interest anyone involved with the archaeology of Minoan Crete as well as those who study the pedological history of other regions. *Soil science and archaeology* Susan

Limbrej, 1972 **SOILS IN ARCHAEOLOGY** Vance T. Holliday, 1992-02-17 Focusing on the archaeological applications of soil chemistry and soil geomorphology, the case histories and reviews presented here combine a wide range of academic disciplines including archaeology, physical geography, Quaternary geology and pedology. The essays range in topic from the use of soils for reconstructing past landscapes, site settings and landscape evolution to the dating of surfaces and deposits. The book also covers the use of soil chemistry in determining the presence or absence of human occupation and for detecting agricultural practices. *Soils in Archaeology* also includes a glossary of selected soil science terms. **BOOK JACKET Title**

Summary field provided by Blackwell North America Inc. All Rights Reserved **Applied Soils and Micromorphology in Archaeology** Richard I. Macphail, Paul Goldberg, 2018 This book uniquely focuses on all aspects of archaeological soil micromorphology based upon the authors' joint sixty years of worldwide studies. *Soils in Archaeological Research* Vance T. Holliday, 2004-08-19 Soils, invaluable indicators of the nature and history of the physical and human landscape, have strongly influenced the cultural record left to archaeologists. Not only are they primary reservoirs for artifacts; they often encase entire sites. And soil-forming processes in themselves are an important component of site formation, influencing which artifacts, features and environmental indicators (floral, faunal and geological) will be destroyed and to what extent and which will be preserved and how well. In this book Holliday will address each of these issues in terms of fundamentals as well as in field case histories from all over the world. The focus will be on principles of soil geomorphology, soil stratigraphy and soil chemistry and their applications in archaeological research. *Archaeological Soil and Sediment Micromorphology* Cristiano Nicosia, Georges Stoops, 2017-10-23 *Archaeological Soil and Sediment Micromorphology* goes beyond a mere review of current literature and features the most up-to-date contributions from numerous scientists working in the field. The book represents a groundbreaking and comprehensive resource covering the plethora of applications of micromorphology in archaeology. *Archaeological Soil and Sediment Micromorphology* offers researchers, students and professionals a systematic tool for the interpretation of thin sections of archaeological contexts. This important resource is also designed to help stimulate the use of micromorphology in archaeology outside Europe where the technique is less frequently employed.

Moreover the authors hope to strengthen the proper application of soil micromorphology in archaeology by illustrating its possibilities and referring in several cases to more specialized publications for instance in the field of plant remains pottery and phytoliths Written for anyone interested in the topic this important text offers Contributions from most of the world s leading authorities on soil micromorphology A series of chapters on the major topics selected among the most recurrent in literature about archaeological soil micromorphology Systematic descriptions of all important micromorphological features Special analytical tools employed on thin sections such as SEM EDS image analysis fluorescence microscopy mass spectrometry among others Numerous cross references 400 illustrated full colour plates The resource provides the most current and essential information for archaeologists geoarchaeologists soil scientists and sedimentologists Comprehensive in scope Archaeological Soil and Sediment Micromorphology offers professionals and students a much needed tool for the interpretation of thin sections of archaeological contexts
