IMPACT OF CLIMATE CHANGE ON GLOBAL SUSTAINABILITY INTERDISCIPLINARY PERSPECTIVES AND SOLUTIONS Dr.M.Tamilselvi, Dr.B.Winmayil, Sustainability is no longer about doing less harm It s about doing more good Jochen Zeitz Climate change refers to long term shifts in temperature weather patterns and environmental conditions on Earth While some changes occur naturally human activities such as burning fossil fuels coal oil and gas deforestation and industrial processes have significantly increased greenhouse gas emissions trapping heat in the atmosphere and causing global warming Climate change is not merely an environmental crisis but a profound challenge to global sustainability affecting ecosystems economies and human societies Rising temperatures extreme meteorological phenomena and biodiversity loss threaten the very foundation of life on Earth Combating climate change requires a collective effort from individuals communities businesses and governments One of the most crucial solutions is reducing carbon emissions by shifting to renewable energy sources such as solar and wind power Sustainable agriculture and forestry practices including forest conservation and eco friendly farming also play a vital role in

preserving biodiversity and maintaining ecological balance Improving energy efficiency in homes industries and transportation helps lower energy consumption and reduce greenhouse gas emissions On a global scale international policies and agreements such as the Paris Agreement encourage countries to collaborate in limiting temperature rise and mitigating climate impacts Additionally raising public awareness and promoting individual actions such as reducing waste using public transport and supporting climate friendly policies are essential steps in fostering a more sustainable future When people make conscious choices about what they consume how they travel and the waste they generate it contributes to a larger shift towards sustainability The power of individual action lies in its ability to inspire others and create a ripple effect that leads to widespread change For instance in August 2018 at the age of 15 Thunberg began protesting outside the Swedish parliament demanding it to take action to address climate change by adhering to the Paris Agreement and reducing greenhouse gas emissions for keeping global temperature rise below 1.5°C Initially a solitary act her protest inspired millions of young people across the globe to join the movement creating the Fridays for Future movement Through legislation carbon pricing and the promotion of renewable energy sources governments can drive large scale environmental change The Danish government has been a global leader in promoting sustainability through comprehensive policies and actions

Perspectives on Environmental History in East Asia Ts'ui-jung Liu, Micah Muscolino, 2021-02-23 This edited volume engages with some of the most dynamic themes in current research on East Asian environmental history including agricultural science war and the environment imperial forestry oceanic history and the history of energy Chapters in this book supply an overview of environmental history as a rapidly expanding field continuing to generate valuable insights into the mutually constitutive relationship between human societies and the biophysical environment The book is divided into three parts Part I consists of three chapters related to land use while Part II includes five chapters that focus on water a topic of perennial concern among environmental historians of East Asia especially as it relates to irrigation food production and marine fisheries Part III consists of two chapters discussing the impact of new technologies on air quality in addition to the history of energy in East Asia which has emerged as an important area of inquiry at the intersection between both environmental history and the history of science and technology Perspectives on Environmental History in East Asia Changes in the Land Water and Air will appeal to students and scholars of East Asian studies environmental history and environmental sciences

Climate Crisis: Adaptive Approaches and Sustainability Uday Chatterjee, Rajib Shaw, Suresh Kumar, Anu David Raj, Sandipan Das, 2024-01-01 This book aims to contribute to the discourse on climate crisis by bringing together high quality empirical research on adaptive approaches and sustainability case studies from across the world The book is divided into six sections The introductory section has two chapters which sets the ground of the book as it discusses the framing of climate crisis and the different approaches towards it It also situates the book within the global discourse The first chapter seeks the traditional approaches to bridge the gap in the new climate science while the second chapter delivers the ultimate reasons for

temperature change global warming and its consequences extreme weather events in a comprehensive way It is hoped that the book as a whole will provide a timely synthesis of a rapidly growing and important field of climate science but will also bring forward new and stimulating ideas that will shape a coherent and fruitful vision for future work for the community of Undergraduates Postgraduates Ph D Scholars and Researchers in the fields of environmental sciences humanistic and social sciences and geography In addition policy and decision makers environmentalists NGOs corporate sectors social scientists and government organizations will find this book to be of great value We believe that a diverse group of academics scientists geographers environmentalists environmental regulators social scientists and sustainable scientists with a common interest within the earth environmental sciences and humanistic and social sciences will find this book to be a comprehensive source for reference Also we strongly deemed that it will also provide some support for various levels of organizations and administrations for developing and achieving UN Sustainable Development Goals by 2030 in purview of climate change
