Olson,1983 **Soils and the Environment** Gerald Olson,2012-12-06 As we enter the last decades of the twentieth century many persistent and perplexing problems continue to afflict humankind Thus it is appropriate to address in a new group of books two of the monumental issues that haunt people throughout the world Soils and the Environment by Professor Gerald W Olson is the first book in this new publishing program on Environment Energy and Society The purpose of all these books will be to explore the many interrelated facets of these topics and to provide guidance for dealing with problems and offering ideas for their solutions Environment and energy are twin problems that occupy what many believe to be opposite sides of a two headed coin They are often viewed as being antithetical and incompatible The various books in this program will try to place in perspective the options that are available to those who design policy and plan and manage societal matters Typical of books being developed currently are ones on coal resources environmental geoscience environmental pollution land use planning nuclear energy mineral resources and water resources However because soils are at the very heart of civilization and provide the building block for human sustenance it is fitting to inaugurate this series with Dr Olson s timely analysis of soils Unfortunately these most vital resources seem to have low priority in many farming enterprises urbanization projects deforestation schemes and mining and developmental terrain changes **Environmental Monitoring and Characterization** Janick Artiola,Ian Pepper,Mark L. Soil Processes and the Carbon Cycle Rattan Lal, John M. Kimble, Ronald F. Follett, B.A. Stewart, 2018-02-06 World soils contain about 1500 gigatons of organic carbon This large carbon reserve can increase atmospheric concentrations of CO₂ by soil misuse or mismanagement or it can

reverse the greenhouse effect by judicious land use and proper soil management

Soil Processes and the Carbon Cycle describes soil processes and their effects on the global carbon cycle while relating soil properties to soil quality and potential and actual carbon reserves in the soil In addition this book deals with modeling the carbon cycle in soil and with methods of soil carbon determinations *Ancient Maya Wetland Agriculture* Mary Deland Pohl,2019-08-27 Changes in the orientation of archaeological research in the post World War n period affected Maya studies The cultural ecological perspective which was rising to prominence put an old debate in bold relief How had this prehistoric civilization adapted to the tropical forest environment How could swidden cultivation have sustained the unexpectedly high population densities that settlement pattern studies appeared to be revealing Had the ancient Maya practiced some form of intensive agriculture Archaeologist Dennis E Puleston went to the Maya Lowlands to investigate geographer Alfred H Siemens s reports of possible intensive agriculture ridged fields seen from the air and to study prehistoric Maya cultivation and civilization from a cultural ecological perspective This volume presents the results of the Rio Hondo Project field research on Albion Island in northern Belize from 1973 to 1980 with the addition of selected results from Pohl s continuing work in northern Belize *Land And Soil Management* Alfredo Sfeir-Younis,2019-04-11 Soil erosion has become a problem of crisis proportions in developing countries around the globe and better approaches to land management are desperately needed This book provides analytical frameworks to guide the creation and appraisal of soil erosion control programs The authors discuss a broad range of important issues involved in designing and implementing more effective soil conservation programs The book begins with a discussion of the physical and economic dimensions of soil erosion and an estimation of the extent of the problem It then explains how to improve the evaluation of soil conservation programs by integrating scientific knowledge with economic methods and procedures A series of practical illustrations graphically demonstrates the application of the concepts derived from the theory The most important organizational institutional technical and macroeconomic aspects of soil and land management appraisal are outlined and the major elements of project or program design are also pinpointed and illustrated Finally the book suggests areas most in need of future research

Archeology and Volcanism in Central America Payson D. Sheets,2014-07-03 Scientists have long speculated on the impact of extreme natural catastrophes on human societies Archeology and Volcanism in Central America provides dramatic evidence of the effects of several volcanic disasters on a major civilization of the Western Hemisphere that of the Maya During the past 2 000 years four volcanic eruptions have taken place in the Zapotit n Valley of southern El Salvador One the devastating eruption of Ilopango around A D 300 forced a major migration pushing the Mayan people north to the Yucat n Peninsula Although later eruptions did not have long range implications for cultural change one of the subsequent eruptions preserved the Cer n site a Mesoamerican Pompeii where the bodies of the villagers the palm thatched roofs of their houses the pots of food in their pantries even the corn plants in their fields were preserved with remarkable fidelity Throughout 1978 a multidisciplinary team of anthropologists archeologists

geologists biologists and others sponsored by the University of Colorado s Protoclassic Project researched and excavated the results of volcanism in the Zapotitan Valley a key Mesoamerican site that contemporary political strife has since rendered inaccessible The result is an outstanding contribution to our understanding of the impact of volcanic eruptions on early Mayan civilization These investigations clearly demonstrate that the Maya inhabited this volcanically hazardous valley in order to reap the short term benefits that the volcanic ash produced fertile soil fine clays and obsidian deposits SSSA Special Publication Series ,1967 *Proceedings of International Symposium on Geographic Information Systems for Conservation and Development Planning* Gerald W.
