Putting the "I" in IHY Barbara J. Thompson, Natchimuthuk Gopalswamy, Joseph M. Davila, Hans J. Haubold, 2009-11-29

Putting the I in IHY This book is about international cooperation It demonstrates how the power of scientific imagination and investigation can bring together people from all continents in almost all countries around the globe In presenting this impressive result we can understand how much unifying force the quest for understanding our universe and using outer space for that purpose have Astronomy is far away from being a political area of science But it has enormous political effects and all of these effects are positive This book about the international aspects and achievements of the International Heliophysical Year IHY 2007 can be regarded as a compendium of the fertile impacts of conducting research in this field The main focus as the title implicates is the international cooperation which has emerged from this grassroots initiative North and South industrialized and developing countries have been coordinating their efforts and have been learning from each other in a mutual partnership under a joint understanding of sharing the scientific benefits Through this trans border networks have been created and scientific as well as cultural exchange took place

The Behavior of Systems in the Space Environment R.N. Dewitt, Dwight Duston, Anthony K. Hyder, 2012-12-06 A NATO Advanced Study Institute ASI on the Behavior of Systems in the Space Environment was held at the Atholl Palace Hotel Pitlochry Perthshire Scotland from July 7 through July 19 1991 This publication is the Proceedings of the Institute The NATO Advanced Study Institute Program of the NATO Science Committee is a unique and valuable forum under whose auspices almost one thousand international tutorial meetings have been held since the inception of the program in 1959 The ASI is intended to be primarily a high level teaching activity at which a carefully defined subject is presented in a systematic and coherently structured program The subject is treated in considerable depth by lecturers eminent in their field and of international standing The subject is presented to other scientists who either will already have specialized in the field or possess an advanced general background The ASI is aimed at approximately the post doctoral level This ASI emphasized the basic physics of the space environment and the engineering aspects of the environment s interactions with spacecraft

The Earth Observer ,2006 **Global**

Environmental Change National Research Council, Policy Division, Board on Sustainable Development, Committee on Global Change Research, 1999-09-14 How can we understand and rise to the environmental challenges of global change One clear answer is to understand the science of global change not solely in terms of the processes that control changes in climate and the composition of the atmosphere but in how ecosystems and human society interact with these changes In the last two decades of the twentieth century a number of such research efforts supported by computer and satellite technology have been launched Yet many opportunities for integration remain unexploited and many fundamental questions remain about the earth's capacity to support a growing human population This volume encourages a renewed commitment to understanding global change and sets a direction for research in the decade ahead Through case studies the book explores what can be learned from the lessons of the past 20 years and what are the outstanding scientific questions Highlights include Research imperatives and strategies for investigators in the areas of atmospheric chemistry climate ecosystem studies and human dimensions of global change The context of climate change including lessons to be gleaned from paleoclimatology Human responses to and forcing of projected global change This book offers a comprehensive overview of global change research to date and provides a framework for answering urgent questions
