*Harta de pilotaj a Dunarii* ,1996      Creation and the Big Bang Clare Raynard Magoon Jr.,2018-10-23 Although the so called big bang theory has been proven and is accepted by over 99 percent of scientists many of us no doubt still wonder

about the beginning of the universe and how something came from nothing We may know how it began but what caused the big bang And more importantly how do we fit into the broader picture In *Creation and the Big Bang* author Clare Raynard Magoon Jr explores the big bang and helps explain the answers to some of these big questions about our origin and our purpose The big bang he argues proves the creation of matter from nothing which in fact confirms the opening verse of the Bible Genesis 1:1 which states In the beginning God created the heavens and the earth It also looks at new scientific discoveries and the founding scientists who studied our origins showing how greats like Sir Francis Bacon Isaac Newton Max Planck and Albert Einstein were all believers and sought after a creator behind the majesty of the cosmos It is reassuring to know that there is a creator of the universe It is even more satisfying to know that the creator God is a personable being who cares about us and watches over us keeping the conditions in the universe and particularly our planet Earth fine tuned at all times to accommodate our existence With both facts and faith we can enjoy this knowledge and this reassurance as we reflect on the fingerprints of God in his creation
