

MODULE 6: INVESTIGATION 2

Coordinate Shapes

This investigation develops the use of coordinates in the context of vertices of shapes which have geometric properties. The activities encourage the reading and writing of coordinate notation through the use of the letter of the alphabet on a grid. Scaling is revisited to transform pixel coordinates to grid coordinates. Connections can be made to the geometric properties of shapes by creating problems and encouraging pupils to exchange their own creations using the **6-Coordinates FINAL** project which is built during the investigation.

Mathematics Describe positions on the full coordinates grid. Interpret remainders as whole number remainders, fractions, or by rounding, as appropriate for the context. Solve problems involving similar shapes where the scale factor is known or can be found. Compare and classify geometric shapes, including quadrilaterals and triangles, based on their properties and sizes. Plot specified points and draw sides to complete a given polygon.	▶ Pupils are required to code and decode messages using the positions of letters on the coordinates grid. ▶ [Extension] Pupils encounter the need to round the result of division operations in order to get sprites to snap to the nearest grid point. ▶ Pupils are required to use the grid variable (in a similar way to the previous investigation) to adapt their project to different grid intervals. ▶ Pupils create and exchange coordinate problems whose solutions require coordinate and properties of shape knowledge.
