Bay County, Past and Present George Ernest Butterfield, 1918 From the Introduction Careful study of the home region furnishes an excellent foundation for the later study of the geography history and government of our nation and of other nations It is interesting and understandable because the child is living in the midst of the conditions events and things studied He sees old friends in a new light Moreover most of the elements in the more advanced studies are to be found at home in the regional study The interaction between man and his physical surroundings has taken place in many ways right here in Bay County The forests furnish the best example for they attracted the people here furnished them with their occupations and in the meantime were cleared away by those people who established rich farms and built great factories in their places Bay City furnishes a good example of two types of cities as it combines the elements both of the trading and distributing center and of the manufacturing center Government has developed step by step from the very simple government of an unsettled region into the complex government of a densely populated county

Animal Satire Robert McKay, Susan McHugh, 2023-08-22. Animal Satire presents a cultural history of animal satire, a critically neglected but persistent presence in the history of cultural production in which animals expose human folly while the strategies of satire expose the folly of human-animal relations. Highlighting the teeming animal presences across the history of satirical expression from Aristophanes to Twitter, with chapters on key works of literature, drama, film, and a plethora of satirical media, Animal Satire reveals the rich rhetorical significance of animality in powering the politics of satire from ancient and medieval through modern and contemporary times. More pressingly, the book makes the case for the significance of satire for understanding the real-world implications of rhetoric about animals in ongoing struggles for justice. By gathering both critical and creative examples from representative media forms, historical periods, and continents, this volume aims to enrich scholarship on the history of satire as well as empower creative practitioners with ideas about its practical applications today.

Playful Materialities Benjamin Beil, Gundolf S. Freyermuth, Hanns Christian Schmidt, Raven Rusch, 2022-08-01. Game culture and material culture have always been closely linked. Analog forms of rule-based play, ludus, would hardly be conceivable without dice, cards, and game boards. In the act of free play, paidia, children as well as adults transform simple objects into multifaceted toys in an almost magical way. Even digital play is suffused with material culture. Games are not only mediated by technical interfaces which we access via hardware and tangible peripherals. They are also subject to material hybridization, paratextual framing, and processes of de- and re-materialization.

Riquet,2019-12-18 Oxford Textual Perspectives is a series of informative and provocative studies focused upon literary texts
conceived of in the broadest sense of that term and the technologies cultures and communities that produce inform and
receive them It provides fresh interpretations of fundamental works and of the vital and challenging issues emerging in
English literary studies By engaging with the materiality of the literary text its production and reception history and
frequently testing and exploring the boundaries of the notion of text itself the volumes in the series question familiar
frameworks and provide innovative interpretations of both canonical and less well known works The Aesthetics of Island
Space discusses islands as central figures in the modern experience of space It examines the spatial poetics of islands in
literary texts from Shakespeare s The Tempest to Ghosh s The Hungry Tide in the journals of explorers and scientists such as
James Cook and Charles Darwin and in Hollywood cinema It traces the ways in which literary and cinematic islands have
functioned as malleable spatial figures that offer vivid perceptual experiences as well as a geopoetic oscillation between the
material energies of words and images and the energies of the physical world The chapters focus on America s island
gateways Roanoke and Ellis Island visions of tropical islands Tahiti and imagined South Sea islands the islands of the US
Canadian border region in the Pacific Northwest and the imaginative appeal of mutable islands It argues that modern
voyages of discovery posed considerable perceptual and cognitive challenges to the experience of space and that these
challenges were negotiated in complex and contradictory ways via poetic engagement with islands Discussions of island
narratives in postcolonial theory have broadened understanding of how islands have been imagined as geometrical
abstractions bounded spaces easily subjected to the colonial gaze There is however a second story of islands in the Western
imagination which runs parallel to this colonial story In this alternative account the modern experience of islands in the age
of discovery went hand in hand with a disintegration of received models of understanding global space Drawing on and
rethinking post phenomenological geocritical and geopoetic theories The Aesthetics of Island Space argues that the modern
experience of islands as mobile and shifting territories implied a dispersal fragmentation and diversification of spatial
experience and it explores how this disruption is registered and negotiated by both non fictional and fictional responses
