Mapping the Darkness Kenneth Miller,2023-10-03 WINNER OF THE 2024 ASJA BOOK AWARD BIOGRAPHY HISTORY NAMED A BEST BOOK OF THE YEAR 2023 BY THE NEW YORKER NEW YORK TIMES EDITOR'S CHOICE SELECTION From award winning journalist Kenneth Miller comes the definitive story of the scientists

who set out to answer two questions Why do we sleep and How can we sleep better A century ago sleep was considered a state of nothingness even a primitive habit that we could learn to overcome Then an immigrant scientist and his assistant spent a month in the depths of a Kentucky cave making nationwide headlines and thrusting sleep science to the forefront of our consciousness In the 1920s Nathaniel Kleitman founded the world's first dedicated sleep lab at the University of Chicago where he subjected research participants including himself to a dizzying array of tests and tortures But the tipping point came in 1938 when his cave experiment awakened the general public to the unknown and vital world of sleep Kleitman went on to mentor the talented but troubled Eugene Aserinsky whose discovery of REM sleep revealed the astonishing activity of the dreaming brain and William Dement a jazz bass playing revolutionary who became known as the father of sleep medicine Dement in turn mentored the brilliant maverick Mary Carskadon who uncovered an epidemic of sleep deprivation among teenagers and launched a global movement to fight it Award winning journalist Kenneth Miller weaves together science and history to tell the story of four outsider scientists who took sleep science from fringe discipline to mainstream obsession through spectacular experiments technological innovation and single minded commitment Readers will walk away with a comprehensive understanding of sleep and why it affects so much of our lives A propulsive utterly engrossing history None of it is simple and all of it is captivating The New York Times Mapping the Darkness offers two narratives at once a sweeping journey of discovery about dreams sleep and the terra incognita of unconsciousness and a wake up call about the dangers of chronic exhaustion It's time Mr Miller tells us to take our sleep back The Wall Street Journal

**The Harvard List of Books in Psychology** Harvard University,1971 The Harvard List of Books in Psychology was first  
compiled in the 1930s when each student in the department enjoyed the luxury of an individual tutorial Together tutor and  
student could map out a course of reading By 1938 the list had proved so useful that its 349 titles were annotated and  
printed though mainly for local consumption Growth of an outside demand from students librarians and the reading public  
led to a supplement in 1944 and a number of successive editions bearing the present title The present edition updates the  
List without expanding it beyond useful size for each new title the compilers have faithfully tried to delete one and new  
entries account for almost half of the present total of 744 Each title is annotated with descriptive and evaluative material
