Small Change For The Long Haul:

Transformation from Wall Street to Wellbeing Janet McIntyre-Mills, 2014-09-02 Transformation from Wall Street to Well being Joining up the dots through Participatory democracy and governance to mitigate the causes and adapt to the effects of climate change addresses accountable leadership supports collective interests ethical governance and fairness to future generations in order to develop systemic approaches relevant to these issues The humanistic focus whilst central addresses how we see ourselves in relation to the environment It explores cultural perspectives in developed and developing parts of the world where people have a closer connection with the natural environment in comparison to those who live in cities Furthermore the book discusses participatory action research to prefigure a means to hold the market to ensure that the use of resources that are necessary for the common good are accessible and equitable The essential systemic aim this book offers is to balance human needs with nature The research summarizes the discourses and the adaptive praxis in order to develop a bridge between cosmopolitan ethics and cosmopolitan governance It does this in the interest of supporting and using cultural designs for living that support quality of life and spans five core domains as explained by the author Overall this monograph helps evaluate the extent to which the introduced approaches enable the community to consider their perceived assets and risks and the implications of their consumption choices

From Polarisation to Multispecies Relationships Janet J. McIntyre-Mills, Yvonne Corcoran-Nantes, 2021-08-05 This book explores the concept of multi species relationships and suggests critical systemic pathways to protect shared habitats This book discusses how the eradication of species as a result of rapid urbanisation places humanity at risk This book demonstrates how narrow anthropocentrism has focused on the rights of human beings at the expense of other species and the environment This book explores a priori norms and a posteriori measures and indicators to include and protect multiple species This book aims to strengthen institutional capacity and powers to address and extend the UN 2030 Sustainable Development Agenda by drawing on local wisdom but also the need to implement laws to prevent ecocide This book highlights that our fragile interdependence requires a recognition of our hybridity and interconnectedness within the web of life and suggests ways to reframe policy within and beyond the nation state to support living systems of which we are a strand

Mixed Methods and Cross Disciplinary Research Janet McIntyre-Mills, Norma R. A. Romm, 2019-07-12 This book uses mixed methods to extend the concept of wellbeing stocks to refer to dynamic ways of working with others It addresses metaphors and praxis for weaving together strands of experience The aim of the wellbeing stocks concept is to enable people to re evaluate economics and to become more aware of the way in which we neglect social and environmental aspects of life The pursuit of profit at the expense of people and the environment is a central problem for democracy and governance The vulnerability of cities is a symptom of the lack of balance between individual and collective needs This book explores the potential for cities specifically in the regions of Indonesia Africa and Australia to become more productive as sites for food and water security through more

creative use of technology It highlights the need for partners that see food and security feasible at the household level if supports are provided at the community national and international level The book examines how these regions are affected by demographics climate change and people movements but also explores ways to establish an effective cultural ecosystem management
