He who knows and knows that he knows is wise follow him ANCIENT PROVERB During a long career of public service as a government procurement and contracting official I am still surprised to find big successful corporations making the same mistakes that neophytes in government contracting mak And this is particularly true in the matter of writing proposals which are the crucial element in most major procurement awards It s true enough as many suspect that the big well known company has something of an edge over the smaller lesser known company com peting for any given government contract psychologically at least The typical government executives whether contracting officials or program managers tend to have a bit more faith in the ability of the large company to carry out the program successfully All things being equal then the big company is more likely to get the nod However because the large companies are well aware of that many tend to become fat dumb and happy they try to coast or rest on their laurels That is they get careless about making a strong enough case for themselves in writing their proposals And when they lose often to smaller companies they are both puzzled and outraged They have for gotten that all government procurement is a competition usually both technical and cost competition and that the little guy can win against the big guy if he tries hard enough And especially if the bigger guy is a bit careless and does not put out his best effort
