Smart Fibres Fabrics And Clothing:

Smart Fibres, Fabrics and Clothing Xiaoming Tao,2001-10-04 This important book provides a guide to the fundamentals and latest developments in smart technology for textiles and clothing The contributors represent a distinguished international panel of experts and the book covers many aspects of cutting edge research and development Smart fibres fabrics and clothing starts with a review of the background to smart technology and goes on to cover a wide range of the material science and fibre science aspects of the technology including Electrically active polymeric materials and the applications of nonionic polymer gel and elastomers for artificial muscles Thermally sensitive fibres and fabrics Cross linked polyol fibrous substrates stimuli responsive interpenetrating polymer network hydrogel Permeation control through stimuli responsive polymer membranes optical fibre sensors hollow fibre membranes for gas separation integrating fibre formed components into textile structures Wearable electronic and photonic technologies Adaptive and responsive textile structures ARTS Biomedical applications including the applications of scaffolds in tissue engineering It is essential reading for academics in textile and materials science departments researchers designers and engineers in the textiles and clothing product design field Product managers and senior executives within textile and clothing manufacturing will also find the latest insights into technological developments in the field valuable and fascinating *Smart Clothing* Gilsoo Cho,2009-12-23 GPS embedded clothing for finding children or skiers when they are lost bio monitoring smart shirts and vests that monitor a patient s vital signs are no longer science fiction but science fact It is quite likely that within 20 or 30 years computers telephones and televisions will be a part of our intimate clothing Covering the whole design **Textiles in Sport** Roshan Shishoo,2005-08-29 The technical developments in the sports clothing industry has resulted in the use of functional textiles for highly specialised performances in different sports Developments include thermal and functional properties and coated and laminated clothes With bio and smart materials providing such a strong focus in the textile industry generally companies are going for value added textiles such as in built sensors which monitor performance In built wear comfort is a growing market trend and includes clothing which improves the skin s performance Written by a distinguished editor and a team of authors from the cutting edge of textile research *Textiles in sport* discusses high performance high function and intelligent textiles for sportswear Invaluable for a broad range of readers Discusses high performance high function and intelligent textiles for sportswear **Smart Textiles for Protection** R Chapman,2012-12-10 Smart textiles are materials and structures that sense and react to environmental conditions or stimuli and their integration into protective clothing has led to the development of products with greatly enhanced protective capabilities in hazardous situations Smart textiles for protection provides a comprehensive analysis of smart materials used in producing protective textiles and explores a wide range of end use protective applications Part one reviews smart materials and technologies Beginning with an overview of smart textiles for protection this section goes on to discuss types of materials surface

treatments and the use of nanofibres and smart barrier membranes The application of sensors actuators and computer systems in smart protective textiles is explored followed by a review of biomimetic approaches to design Part two investigates specific applications of smart textiles for protection Smart technology for personal protective equipment and clothing smart protective textiles for older people and smart high performance textiles for protection in construction and geotechnical applications are all discussed in depth as is the use of smart textiles in the protection of armoured vehicles and in protective clothing for fire fighters and first responders The final chapter describes recent advances in chemical and biological protective clothing With its distinguished editor and international team of expert contributors Smart textiles for protection is an essential guide for all those involved in the design development and application of protective smart textiles Provides a comprehensive analysis of smart materials used in producing protective textiles and explores a wide range of end use protective applications Discusses types of materials surface treatments and the use of nanofibres and smart barrier membranes as well as the application of sensors actuators and computer systems in smart protective textiles Investigates specific applications of smart textiles for protection including smart high performance textiles for protection in construction and geotechnical applications

Smart Textile Coatings and Laminates William C Smith,2010-01-28 Smart coatings can produce coatings that offer above and beyond the normal functions of a coating these range from improving the performance of fabrics producing new forms of materials to providing decoration This book reviews a variety of topics about textile coatings and laminates and aims to provide a stimulus for developing new and improved textile products The first part of the book introduces the fundamentals of textile coatings and laminates addressing general areas such as coating and laminating processes and techniques as well as base fabrics and their interaction in coated fabrics Part two discusses different types of smart and intelligent coatings and laminates for textiles Topics include microencapsulation technology conductive coatings breathable coatings and phase change materials and their application in textiles With its highly distinguished editor and array of international contributors Smart textile coatings and laminates is a valuable reference book for chemists textile technologists fibre scientists textile engineers and all those wishing to improve and understand the developments in textile coating and laminating technology It will also be suitable for researchers in industry or academia Reviews a number of issues surrounding textile coatings and laminates Discusses the fundamentals of textile coatings and laminates addressing processes and techniques Examines types of smart and intelligent coatings and laminates for textiles including microencapsulation technology conductive and breathable coatings

Active Coatings for Smart Textiles Jinlian Hu,2016-04-06 Active Coatings for Smart Textiles presents the latest information on active materials and their application to textiles in the form of coatings and finishes for the purpose of improving performance and creating active functional effects This important book provides detailed coverage of smart coating types processes and applications After an introduction to the topic Part One introduces various types of smart and active coatings including memory polymer coatings durable and self

cleaning coatings and breathable coatings Technologies and related processes for the application of coatings to textiles is the focus of Part Two with chapters devoted to microencapsulation technology plasma surface treatments and nanotechnology based treatments The book ends with a section on applications of smart textiles with responsive coatings which are increasingly finding commercial niches in sportswear protective clothing medical textiles and architecture Introduces various types of smart and active coatings for textiles Covers technologies and application processes for the coating and finishing of textiles Reviews commercial applications of such coatings including in sportswear protective clothing medical textiles and architecture

Smart Textiles and Their Applications Vladan Koncar,2016-04-22 Smart Textiles and Their Applications outlines the fundamental principles of applied smart textiles also reporting on recent trends and research developments Scientific issues and proposed solutions are presented in a rigorous and constructive way that fully presents the various results prototypes and case studies obtained from academic and industrial laboratories worldwide After an introduction to smart textiles and their applications from the editor Part One reviews smart textiles for medical purposes including their use in health monitoring treatment delivery and assistive technologies Part Two covers smart textiles for transportation and energy with chapters covering smart textiles for the monitoring of structures and processes as well as smart textiles for energy generation The final section considers smart textiles for protection security and communication and includes chapters covering electrochromic textile displays textile antennas and smart materials for personal protective equipment Scientific issues and proposed solutions are presented in a rigorous and constructive way regarding various results prototypes and case studies obtained from academic and industrial laboratories worldwide Useful for researchers and postgraduate students and also for existing companies and start ups that are developing products involving smart textiles Authored and edited by an international team who are experts in the field ensure comprehensive coverage and global relevance

Advances in Smart Medical Textiles Lieva van Langenhove,2015-12-02 Advances in Smart Medical Textiles Treatments and Health Monitoring provides comprehensive coverage on smart textiles the emerging and important materials that are finding applications in the fields of medicine and healthcare The book explores the range of smart textiles available for use in medicine and the transfer of these innovative technologies into medical applications Early chapters survey various smart fibers fabrics and finishes while subsequent sections focus on the role of smart textiles in treating patients from wound care to rehabilitation and the use of textile based sensors and wearable electronics for monitoring patient health Provides a comprehensive review of the materials used in smart medical textiles Analyzes the application of these textiles in medical treatments and sensors for health monitoring Covers the range of international research in the field and keeps focus on the needs of the textile industry
