## **Sociology Windows On Society:**

**Sociology** John W. Heeren, Marylee Mason, 1992      *Sociology: Windows on Society* Robert H. Lauer, Jeanette C. Lauer, 2005-02-07 The seventh edition of Lauer and Lauer's best selling anthology *Sociology Windows On Society* has been significantly updated with fifteen new selections. The book continues to draw on both contemporary sources and the classical literature of sociology to explore the nature of social life with an emphasis on issues of gender, race, ethnicity, and inequality. The editors have chosen articles that challenge preconceived notions and conventional wisdom while also demonstrating the distinctive power of the sociological viewpoint. The units are divided into parts to show how the selections fit into the topics covered in the introductory course. Major concepts are highlighted and explained in the introductions to the units, parts, and in each selection. Review questions and application projects encourage students to get involved in the learning process and help them better understand social research and methods. Related websites have been added to each selection so that students can pursue additional research on their own or as part of an assignment. Also new to this edition is a subject index. New selections in the seventh edition address such topics as: The issue of equality in marriage compared across thirteen nations; How culture influences the sexuality of Asian Americans; Why some men are regular customers of strip clubs; Socializing problems of interracial couples; Why poverty is a structural not a personal problem; Everyday sexism; The economic differences between Republicans and Democrats; The issue of national security versus civil liberties; How technology affects interpersonal relationships; Violence and suffering among prostitutes; How social movements affect social policy.

whether one is born male or female Gender developmental scientists are concerned with age related changes in gender typing and more broadly with many issues about the emergence and patterning of gendered behaviors and thinking Description of these changes is vitally important as it informs theoretical approaches to gender development Using a broad lens on age related changes provides important information describing how development occurs but shorter time frames are also useful for identifying processes that may underlie developmental patterns Gender has been increasingly acknowledged as a critical variable in analysis and development planning Gender is an expression of power in social relationship between men and women The book will be very useful to academicians researchers planners students NGOs civil societies and all those who are interested in women studies in general and gender issues in contexts in particular
